Leveraging Transdisciplinary Engineering in a Changing and Connected World Adam Cooper, 2023-11-15 Simple problems have become rare in today's technologically advanced world Problems are typically much more complex and solving them requires integrative knowledge from several disciplines Technology alone cannot be the answer Collaborative teams equipped with knowledge and skills in various disciplines are indispensable to exploit technologies effectively and create new conceptual theoretical methodological and translational innovations that integrate and move beyond discipline specific approaches to address a common problem in the changing and connected world This book presents the proceedings of TE2023 the 30th International Conference on Transdisciplinary Engineering held in Hua Hin Cha Am Thailand from 11-14 July 2023 The theme of this year's conference was Leveraging Transdisciplinary Engineering in a Changing and Connected World and it provided a forum for more than 115 participants from academia and industry to exchange knowledge and ideas connected to this aspect of transdisciplinary engineering A total of 117 submissions were received for the conference of which 93 were selected for presentation and publication here following a rigorous abstract and full paper review process They are arranged under 7 categories product design and development team working smart operations for value chain management transdisciplinary approaches engineering education critical issues in transdisciplinary engineering and theoretical contributions Providing a comprehensive overview of the latest innovations and ideas in transdisciplinary engineering the book will be of interest to all those working in the field

Manufacturing Cost Policy Deployment (MCPD) and Methods Design Concept (MDC) Alin Postecă, Shigeyasu Sakamoto, 2017-03-27 Providing a reasonable level of profitability through productivity is and will remain one of the fundamental tasks of the management teams of any production company Manufacturing Cost Policy Deployment MCPD and Methods Design Concept MDC The Path to Competitiveness contains two new methodologies to improving the productivity and profitability of production systems that continuously increase competitiveness Manufacturing Cost Policy Deployment

MCPD and Methods Design Concept MDC Both MCPD and MDC are the result of long time synthesis and distillation being implemented successfully totally or partially in many companies The MCPD system developed by Alin Postec is a manufacturing cost policy aimed at continuous cost improvement through a systemic and systematic approach The MCPD is a methodology that improves the production flow driven by the need for Manufacturing Cost Improvement MCI for both existing and future products through setting targets and means to continuously improve production process productivity for each product family cost The MDC developed by Shigeyasu Sakamoto design the effective manufacturing methods using a tool of engineering steps identifying ideas for increasing productivity called KAIZENSHIRO improvable value as a target The MDC results on production methods lead to effectiveness of work measurement for performance P and to knowledge and improvement of production control and planning as utilization U in order to achieve labor target costs The combination of MCPD and MDC methodologies can provide a unique approach for the managers who are seeking new ways for increasing productivity and profitability to increase the competitive level of their manufacturing company
