

The Vision & Practice Of Belonging
PLAYING BY HEART

"Fred Donaldson sweeps across the heavens and the earth, indeed the whole cosmos, in awakening us to the meaning and reality of play. He informs us, in a masterful style, that play is an energy found everywhere — 'it is our common ground of Creation.' This is a necessary book of joy and hope for these times."

Peak Vitality Jeanne House, 2008-03-31 We often strive for our peak of accomplishment, peak health, peak wealth, peak performance. The idea for this anthology came from a further question that is both simple but provocative: What if we could exceed the upper limits of our performance? What would happen if rather than focusing on being physically well, we imagined ourselves physically vibrant? What would happen if rather than seeking 100% of the good that might come to us, we pushed past our boundaries and pictured what 112% might look like? What would happen if we took our upper limits of vision as a baseline rather than a ceiling? Could we be happier, more abundant, and healthier than our wildest dreams? That's what *Peak Vitality* is all about. It calls us to examine the thresholds of our thinking, feeling, and experiencing, then go beyond what we believe we're capable of. Includes chapters from bestselling authors such as Wayne Dyer, Christiane Northrup, Candace Pert, Deepak Chopra, Julia Cameron, Riane Eisler, Dean Ornish, and many more.

The Evolved Nest Darcia Narvaez, PhD, G. A. Bradshaw, PhD, 2023-08-08 A fascinating look into nurturing and parenting in the natural world, supplemented with original illustrations. For readers of *Becoming Animal* and *World of Wonders*, a beautiful resource for Nature advocates, parents, to be, animal lovers, and anyone who seeks to restore wellbeing on our planet. The Evolved Nest reconnects us to lessons from the animal world and shows us how to restore wellness in our families, communities, and lives. Each of 10 chapters explores a different animal's parenting model, sharing species-specific adaptations that allow each to thrive in their evolved nests. You'll learn how wolves build an internal moral compass, how beavers foster a spirit of play in their children, how octopuses develop emotional and social intelligence, how and whether or not brown bears decide to have children. What their lessons can teach you, whether you're a parent, grandparent, caregiver, or child-free. Psychologists Drs. Darcia Narvaez and Gay Bradshaw show us how each evolved nest offers inspiration for reexamining our own systems of nurturing, understanding, and caring for our young and each other. Alongside beautiful illustrations, stunning scientific facts, and lessons in neuroscience, psychology, and evolutionary biology, we learn to care deeper, to restore our innate place within the natural world, and fight for an ecology of life that supports our flourishing in balance with Nature, alongside our human and non-human family.
