Rolfe D. Mandel, 2000 Geoarchaeology is the application of geoscience to the study of archaeological deposits and the archaeological record Employing techniques from pedology geomorphology sedimentology geochronology and stratigraphy geoarchaeologists investigate and interpret sediments soils and landforms at the focal points of archaeological research Edited by Rolfe D Mandel and with contributions by John Albanese Joe Allen Artz E Arthur Bettis III C Reid Ferring Vance T Holliday David W May and Mandel this volume traces the history of all major projects researchers theoretical developments and sites contributing to our geoarchaeological knowledge of North America's Great Plains The book provides a historical overview and explores theoretical questions that confront geoarchaeologists working in the Great Plains where North American geoarchaeology emerged as a discipline *Bison and People on the North American Great Plains* Geoff Cunfer, Bill Waiser, 2016-10-04 The near disappearance of the American bison in the nineteenth century is commonly understood to be the result of over hunting capitalist greed and all but genocidal military policy This interpretation remains seductive because of its simplicity there are villains and victims in this familiar cautionary tale of the American frontier But as this volume of groundbreaking scholarship shows the story of the bison's demise is actually quite nuanced *Bison and People on the North American Great Plains* brings together voices from several disciplines to offer new insights on the relationship between humans and animals that approached extinction The essays here transcend the border between the United States and Canada to provide a continental context Contributors include historians archaeologists anthropologists paleontologists and Native American perspectives This book explores the deep past and examines the latest knowledge on bison anatomy and physiology how bison responded to climate change especially drought and early bison hunters and pre contact trade It also focuses on the era of European contact in particular the arrival of the horse and some of the first known instances of over hunting By the nineteenth century bison reached a tipping point as a result of new tanning practices an early attempt at protective legislation and ventures to introducing cattle as a replacement stock The book concludes with a Lakota perspective featuring new ethnohistorical research *Bison and People on the North American Great Plains* is a major contribution to environmental history western history and the growing field of transnational history **Archaeology on the Great Plains** W. Raymond Wood, 1998 This synthesis of Great Plains archaeology brings together what is currently known about the inhabitants of the ancient Plains The essays review the Paleo Indian Archaic Woodland and Plains Village peoples providing information on technology diet settlement and adaptive patterns *The Nature of Nebraska* Paul A.

Johnsgard,2005-01-01 Where the eastern and western currents of American life merge as smoothly as one river flows into another is a place called Nebraska There we find the Platte a river that gave sustenance to the countless migrants who once trudged westward along the Mormon and Oregon trails We find the Sandhills a vast region of sandy grassland that represents the largest area of dunes and the grandest and least disturbed region of mixed grass prairies in all the Western Hemisphere And below it all we find the Ogallala aquifer the largest potential source of unpolluted water anywhere These ecological treasures are all part of the nature of Nebraska With characteristic clarity energy and charm Paul A Johnsgard guides us through Nebraska s incredible biodiversity introducing us to each ecosystem and the flora and fauna it sustains and inviting us to contemplate the purpose and secrets of the natural world as we consider our own roles and responsibilities in our connection with it **Ecology and Human Organization on the Great Plains** Douglas B. Bamforth,2013-06-29

Stratigraphy and Paleoenvironments of Late Quaternary Valley Fills on the Southern High Plains Steven Bozarth,1995-01-01 **Kansas Archaeology** Robert J. Hoard,William E. Banks,2006 Synthesizes what is known about the cultural human history of Kansas from 10 000 B C to the nineteenth century This significant contribution to Plains archaeology provides the reader with the first comprehensive overview of the subject in nearly fifty years *Wildlife of Nebraska* Paul A. Johnsgard,2020-10 In *Wildlife of Nebraska A Natural History* Paul A Johnsgard surveys the variety and biology of more than six hundred Nebraska species Narrative accounts describe the ecology and biology of the state s birds its mammals and its reptiles and amphibians summarizing the abundance distributions and habitats of this wildlife To provide an introduction to the state s major ecosystems climate and topography Johnsgard examines major public access natural areas including national monuments wildlife refuges and grasslands state parks and wildlife management areas and nature preserves Including more than thirty five line drawings by the author along with physiographic ecological and historical maps *Wildlife of Nebraska* is an essential guide to the wildlife of the Cornhusker State **Paleozoology and Paleoenvironments** J. Tyler Faith,R. Lee Lyman,2019-02-21 *Paleozoology and Paleoenvironments* outlines the reconstruction of ancient climates floras and habitats on the basis of animal fossil remains recovered from archaeological and paleontological sites In addition to outlining the ecological fundamentals and analytical assumptions attending such analyzes J Tyler Faith and R Lee Lyman describe and critically evaluate many of the varied analytical techniques that have been applied to paleozoological remains for the purpose of paleoenvironmental reconstruction These techniques range from analyses based on the presence or abundance of species in a fossil assemblage to those based on taxon free ecological characterizations All techniques are illustrated using faunal data from archaeological or paleontological contexts Aimed at students and professionals this volume will serve as fundamental resource for courses in zooarchaeology paleontology and paleoecology **Late Cretaceous and Cenozoic Mammals of North America** Michael O. Woodburne,2004-04-21 This book places into modern context the information by which North American mammalian paleontologists recognize divide calibrate and discuss intervals of

mammalian evolution known as North American Land Mammal Ages It incorporates new information on the systematic biology of the fossil record and utilizes the many recent advances in geochronologic methods and their results The book describes the increasingly highly resolved stratigraphy into which all available temporally significant data and applications are integrated Extensive temporal coverage includes the Lancia part of the Late Cretaceous and geographical coverage includes information from Mexico an integral part of the North American fauna past and present Eolian Sediments and Processes M.E. Howell,2005-08-12 A fundamental aspect of the work of ecosystem restoration is to rediscover the past and bring it into the present to determine what needs to be restored why it was lost and how best to make it live again This handbook makes essential connections between past and future ecosystems bringing together leading experts to offer a much needed introduction to the field of historical ecology and its practical application by on the ground restorationists from publisher description **Hunters of the Recent Past** Leslie B. Davis,Brian O.K. Reeves,2014-10-30 One of a series of more than 20 volumes resulting from the World Archaeological Congress September 1986 which brought together archaeologists and anthropologists from many parts of the world academics from contingent disciplines and non academics from a wide range of cultural backgrounds This book considers prehistoric and more recent manifestations of human hunting behaviour with a general emphasis on communal hunting It demonstrates that the combination of archaeological ethnographic and ethnohistorical approaches provides a researched basis for consideration of the topic on worldwide regional and local scales It includes theoretical and methodological issues within a context of enquiry original data presentation and discussion It is of interest to archaeologists anthropologists and ethnohistorians **Proceedings RMRS.** ,1998 *Proceedings* ,2007 The 26 papers in these proceedings are divided into five sections The first two sections are an introduction and a plenary session that introduce the principles and role the shrub life form in the High Plains including the changing dynamics of shrublands and grasslands during the last four plus centuries The remaining three sections are devoted to fire both prescribed fire and wildfire in shrublands and grassland shrubland interfaces water and ecophysiology shrubland ecosystems and the ecology and population biology of several shrub species **Bibliography of North American Geology** ,1970 1919 28 cumulation includes material previously issued in the 1919 20 1935 36 issues and also material not published separately for 1927 28 1929 39 cumulation includes material previously issued in the 1929 30 1935 36 issues and also material for 1937 39 not published separately Geological Survey Bulletin ,1973 The Settlement of the American Continents C. Michael Barton,Geoffrey A. Clark,David R. Yesner,Georges A. Pearson,2016-03-04 When many scholars are asked about early human settlement in the Americas they might point to a handful of archaeological sites as evidence Yet the process was not a simple one and today there is no consistent argument favoring a particular scenario for

the peopling of the New World This book approaches the human settlement of the Americas from a biogeographical perspective in order to provide a better understanding of the mechanisms and consequences of this unique event It considers many of the questions that continue to surround the peopling of the Western Hemisphere focusing not on sites dates and artifacts but rather on theories and models that attempt to explain how the colonization occurred Unlike other studies this book draws on a wide range of disciplines archaeology human genetics and osteology linguistics ethnology and ecology to present the big picture of this migration Its wide ranging content considers who the Pleistocene settlers were and where they came from their likely routes of migration and the ecological role of these pioneers and the consequences of colonization Comprehensive in both geographic and topical coverage the contributions include an explanation of how the first inhabitants could have spread across North America within several centuries the most comprehensive review of new mitochondrial DNA and Y chromosome data relating to the colonization and a critique of recent linguistic theories Although the authors lean toward a conservative rather than an extreme chronology this volume goes beyond the simplistic emphasis on dating that has dominated the debate so far to a concern with late Pleistocene forager adaptations and how foragers may have coped with a wide range of environmental and ecological factors It offers researchers in this exciting field the most complete summary of current knowledge and provides non specialists and general readers with new answers to the questions surrounding the origins of the first Americans
