Psychology as Ethics Giovanni Colacicchi,2020-09-28 Through his clinical work and extensive engagement with major figures of the philosophical tradition Jung developed an original and pluralistic psycho ethical model based on the cooperation of consciousness with the unconscious mind By drawing on direct quotations from Jung s collected works The Red Book and his interviews and seminars as well as from seminal texts by Kant Nietzsche

Aristotle and Augustine Giovanni Colacicchi provides a philosophically grounded analysis of the ethical relevance of Jung's analytical psychology and of the concept of individuation which is at its core The author argues that Jung transforms Kant's consciousness of duty into the duty to be conscious while also endorsing Nietzsche's project of an individual ethics beyond collective morality Colacicchi shows that Jung is concerned like Aristotle with the human need to acquire a balance between reason and emotions and that Jung puts forward with his understanding of the shadow a moral psychology of the Christian notion of evil Jung's psycho-ethical paradigm is thus capable of integrating ethical theories which are often read as mutually exclusive Psychology as Ethics will be of interest to researchers in the history of ideas and the philosophy of the unconscious as well as to therapists and counsellors who wish to place their psychodynamic work in its philosophical context It will also be a key reference for undergraduate and postgraduate courses and seminars in Jungian and Post Jungian studies philosophy psychoanalytic studies psychology religious studies and the social sciences **Childhood Re-imagined** Shiho

Featherstone,Wendy Hollway,2002-09-11 Children's rights lone motherhood and the breakdown of families are all issues at the forefront of current social debate in the West with little agreement on what constitutes good parenting or how the needs

of both mother and child are best met The feminist contribution to this debate is particularly important in keeping in view the diverse identities of all those who provide mothering The psychoanalytic contribution is often undervalued and misunderstood Mothering and Ambivalence brings together authors from therapeutic academic and social work backgrounds to discuss dependency anxiety and gender relations within families Drawing on extensive professional experience the contributors combine a psychoanalytic and feminist approach to mothering which transcends the polarized and simplistic political debate about women s and children s needs They also show how such an approach can inform and improve professional practice

Controversies in Analytical Psychology Robert Withers,2003 How can controversy promote mutual respect in analytical psychology Analytical psychology is a broad church and influences areas such as literature cultural studies and religion However in common with psychoanalysis there are many different schools of thought and practice which have resulted in divisions within the field Controversies in Analytical Psychology picks up on these and explores many of the most hotly contested issues in and around analytical psychology A group of leading international Jungian authors have contributed papers from contrasting perspectives on a series of key controversies Some of these concern clinical issues such as what helps patients get better or how closely analysts should work with the transference Other contributions focus on the relationship between analytical psychology and other disciplines including evolutionary theory linguistics politics and religion A critical eye is cast over Jungian theories and practices and a number of questions are raised are they homophobic do they denigrate women do they confuse absolute with narrative truth are the frequency of sessions chosen for political rather than clinical reasons Controversies in Analytical Psychology encourages critical thinking on a variety of issues helping foster dialogue and investigation in a climate of mutual respect and understanding It will be invaluable for Jungian analysts and psychoanalysts in training and practice and psychotherapists
