Learn to Interpret your Natal Chart

Jideon Francisco Marques, 2024-09-23

This book is not a smorgasbord of astrology. You will not find a single word about a sign's signature flower, gemstone, favorite color, or average shoe size in this book. Only the essential meanings of the signs, planets, houses, and aspects, simply but deeply defined, are present, not flaky keywords and stereotypes that contain no personalized meaning. You will also learn how to quickly get into the nitty-gritty of interpreting a chart with skill and insight. You will find out how to get to the deepest layers of a natal chart and bring what is most essential and meaningful to the surface. Many valuable and interesting topics branch out from these essentials, such as the study of asteroids, comets, fixed stars, decanates, or transits and progressions. All of these topics are worthy of further study and can enrich your knowledge and application of astrology, but they all build off of an understanding of the essentials of natal astrology.

This inspiring book teaches you the key essentials of chart interpretation by focusing on Pluto and the locations of your north and south nodes so you can figure out the steps you need to take in order to grow and ultimately discover your soul's karmic mission.

Scorpio Ascendant Secrets

Saket Shah, 2020-01-05. There are times when people just can't identify with the attributes of their Sun or Moon sign. In fact, they may feel that they are an antithesis of their zodiac sign. You may also have observed it: Your Leo friend may not seek attention, may be because he or she has a Capricorn ascendant. Your Sagittarius friend is very possessive, may be because he or she has a Scorpio Ascendant. It is easy to understand why some people do not correspond to their Sun or Moon signs once you know about what is the rising sign or Ascendant in a horoscope. Ascendant is the degree of the zodiac sign that was highest on the Eastern horizon at the time and place of birth. When seen from Earth, the sky seems to move so the entire zodiac can be observed in a span of 24 hours, day and night, which means the rising sign changes on the Eastern horizon every 2 hours because there are 12 zodiac signs. People tend to associate their physical, emotional, and spiritual attributes more with rising sign at times.
