The Writing Experiment Hazel Smith, 2020-07-16 A systematic and engaging approach to creative writing Carla Harryman Wayne State University By suggesting that students who are not born poets can yet learn to become good ones Smith performs a very important service Professor Susan M Schultz University of Hawaii This is an impressive book because it covers areas of creative writing practice and theory that have not been covered in published form It links radical practice with radical but better known theory and will appeal to anyone looking for a different approach Robert Sheppard Edge Hill College of Higher Education UK The Writing Experiment demystifies the process of creative writing showing that successful work does not arise from talent or inspiration alone Hazel Smith breaks down writing into incremental stages revealing processes that are often unconscious or unacknowledged and shows how they can become part of a systematic writing strategy The book encourages writers to take an explorative and experimental approach to their work It relates practical strategies for writing to major twentieth century literary and cultural movements including postmodernism Suitable for both beginners and experienced writers The Writing Experiment covers many genres including fiction poetry writing for performance and new media Each chapter is illustrated with extensive examples of both student work and published writing and challenging exercises offer writers at all levels opportunities to develop their skills [Reading Writing Interfaces](#) Lori Emerson, 2014-06-01 Lori Emerson examines how interfaces from today's multitouch devices to yesterday's desktops from typewriters to Emily Dickinson's self-bound fascicle volumes mediate between writer and text as well as between writer and reader Following the threads of experimental writing from the present into the past she shows how writers have long tested and transgressed technological boundaries Reading the means of production as well as the creative works they produce

Emerson demonstrates that technologies are more than mere tools and that the interface is not a neutral border between writer and machine but is in fact a collaborative creative space. *Reading Writing Interfaces* begins with digital literature's defiance of the alleged invisibility of ubiquitous computing and multitouch in the early twenty-first century and then looks back at the ideology of the user-friendly graphical user interface that emerged along with the Apple Macintosh computer of the 1980s. She considers poetic experiments with and against the strictures of the typewriter in the 1960s and 1970s and takes a fresh look at Emily Dickinson's self-printing projects as a challenge to the coherence of the book. Through archival research, Emerson offers examples of how literary engagements with screen-based and print-based technologies have transformed reading and writing. She reveals the ways in which writers from Emily Dickinson to Jason Nelson and Judd Morrissey work with and against media interfaces to undermine the assumed transparency of conventional literary practice.

Fluid Screens, Expanded Cinema Janine Marchessault, Susan Lord, 2008-06-20 As a medium, film is constantly evolving both in form and in content. *Fluid Screens Expanded Cinema* considers the shift from traditional cinema to new frontiers of interactive, performative, and networked media. Using the theories of Marshall McLuhan and Gilles Deleuze as a starting point, renowned scholars from the fields of film theory, communication studies, cultural studies, and new media theory explore the ways in which digital technology is transforming contemporary visual culture. The essays consider a series of questions: What constitutes the new in new media? How are digital aesthetics different from film aesthetics? What new forms of spectatorship and storytelling, political community, and commodity production are being enabled through the digital media? Using Gene Youngblood's 1970 book *Expanded Cinema* as an anchor for the volume, *Fluid Screens Expanded Cinema* understands the digital not simply as a technological form but also as an experience of space and time that is tied to capitalism. This important collection is unique in framing a range of social justice issues with aesthetic theories of new digital screen culture that will appeal to scholars and multimedia artists prepared to break new ground.

Close Reading New Media Jan van Looy, Jan Baetens, 2003 *Close Reading New Media* is the first publication to apply the method of close analysis to new media. Since the early nineteen nineties, electronic art and literature have continually gained importance in artistic and academic circles. Significant critical and theoretical attention has been paid to how new media allow the text to break traditional power relations and boundaries. The passive reader becomes an active participant, choosing his own path and assembling not just his own interpretation of the text, level of the signified, but also his own text level of the signifier. Texts no longer have a beginning or an ending, being a web of interlinked nodes. The decentered nature of electronic text empowers and invites the reader to take part in the literary process. Poststructuralist theorists predicted a total liberation of textual restrictions imposed by the medium of print. However, while these are culturally significant claims, little attention has been paid to their realization. The goal of this volume is twofold. Our aim is to shed light on how ideas and theories have been translated into concrete works, and we want to comment on the process of close reading and how it can be applied to electronic literature.

While all contributions deal with particular works their aim is always to provide insight into how electronic fiction and new media can be read This book proposes close readings of work by Mark Amerika Darren Aronofsky M D Coverley Raymond Federman Shelley Jackson Rick Pryll Geoff Ryman and Stephanie Strickland
