Semio Physics A Sketch:

Semio Physics René Thom, 1990 **Understanding Violence** Lorenzo Magnani, 2024-06-22 This book offers a philosophical account of violence engaged with both empirical and theoretical debates in disciplines such as cognitive science sociology psychiatry anthropology political theory evolutionary biology and theology The primary thesis is that violence is intertwined with morality and typically enacted for moral reasons To show this the book compellingly demonstrates how morality operates to trigger and justify violence and how people in their violent behaviors can engage and disengage with discrete moralities The author's fundamental account of language and in particular its normative aspects is particularly insightful as regards extending the range of what is to be understood as violence beyond the domain of physical harm By employing concepts such as coalition enforcement moral bubbles cognitive niches overmoralization and military intelligence the book aims to spell out how perpetrators and victims of violence systematically disagree about the very nature of violence The author's original claim is that disagreement can be understood naturalistically described by an account of morality informed by evolutionary perspectives as well This book helps us come to terms with the fact that we are intrinsically violent beings To acknowledge this condition and our stupefying capacity to inflict harm is a responsibility we must face up to such understanding could ultimately be of help in order to achieve a safer ownership of our destinies by individuating and reinforcing those cognitive firewalls that would prevent violence from always escalating and overflowing This second edition is thoroughly revised and integrated with two new chapters to cover new aspects of violence and its understanding such as the role of looting finance in facilitating violent outcomes and the attack to scientific cognition and human creativity **The Logic of Social Practices** Raffaella Giovagnoli, Robert Lowe, 2020-02-04 This book reports on cutting edge research concerning social practices Merging perspectives from various disciplines including philosophy biology and cognitive science it discusses theoretical aspects of social behavior along with models to investigate them and also presents key case studies Further It describes concepts related to habits routines and rituals and examines important features of human action such as intentionality and choice exploring the influence of specific social practices in different situations Based on a workshop held in June 2018 at the 6th World Congress of Universal Logic UNILog2018 in Vichy and including additional invited chapters the book offers fresh insights into the fields of social practice and the cognitive computational and philosophical tools to understand them *Poiesis and Enchantment in Topological Matter* Xin Wei Sha, 2013-12-06 A groundbreaking conception of interactive media inspired by continuity field and process with fresh implications for art computer science and philosophy of technology In this challenging but exhilarating work Sha Xin Wei argues for an approach to materiality inspired by continuous mathematics and process philosophy Investigating the implications of such an approach to media and matter in the concrete setting of installation or event based art and technology Sha maps a genealogy of topological media that is of an articulation of continuous matter that relinquishes a

priori objects subjects and egos and yet constitutes value and novelty Doing so he explores the ethico aesthetic consequences of topologically creating performative events and computational media Sha s interdisciplinary investigation is informed by thinkers ranging from Heraclitus to Alfred North Whitehead to Gilbert Simondon to Alain Badiou to Donna Haraway to Gilles Deleuze and Félix Guattari Sha traces the critical turn from representation to performance citing a series of installation events envisioned and built over the past decade His analysis offers a fresh way to conceive and articulate interactive materials of new media one inspired by continuity field and philosophy of process Sha explores the implications of this for philosophy and social studies of technology and science relevant to the creation of research and art Weaving together philosophy aesthetics critical theory mathematics and media studies he shows how thinking about the world in terms of continuity and process can be informed by computational technologies and what such thinking implies for emerging art and technology

Evolutionary Perspectives on Imaginative Culture Joseph Carroll, Mathias Clasen, Emelie Jonsson, 2020-08-28 This pioneering volume offers an expansive introduction to the relatively new field of evolutionary studies in imaginative culture Contributors from psychology neuroscience anthropology and the humanities probe the evolved human imagination and its artefacts The book forcefully demonstrates that imagination is part of human nature Contributors explore imaginative culture in seven main areas Imagination Evolution Mechanisms and Functions Myth and Religion Aesthetic Theory Music Visual and Plastic Arts Video Games and Films Oral Narratives and Literature Evolutionary Perspectives on Imaginative Culture widens the scope of evolutionary cultural theory to include much of what culture means in common usage The contributors aim to convince scholars in both the humanities and the evolutionary human sciences that biology and imaginative culture are intimately intertwined The contributors illuminate this broad theoretical argument with comprehensive insights into religion ideology personal identity and many particular works of art music literature film and digital media The chapters Imagination the Brain s Default Mode Network and Imaginative Verbal Artifacts and The Role of Aesthetic Style in Alleviating Anxiety About the Future are licensed under the terms of the Creative Commons Attribution 4.0 International License <http://creativecommons.org/licenses/by/4.0/>

The Sense of Rhythm Giulia Ceriani, 2023-08-28 This new edition published for the first time in English brings semiotician Giulia Ceriani s research to English speaking students and researchers across disciplines The Sense of Rhythm serves as a foundation for interdisciplinary research creative practices and a unique semiotic approach to the study of rhythm

Model-Based Reasoning in Science and Technology Lorenzo Magnani, Walter Carnielli, Claudio Pizzi, 2010-08-30 Systematically presented to enhance the feasibility of fuzzy models this book introduces the novel concept of a fuzzy network whose nodes are rule bases and their interconnections are interactions between rule bases in the form of outputs fed as inputs

Narrative Complexity Marina Grishakova, Maria Poulaki, 2019-08-01 The variety in contemporary philosophical and aesthetic thinking as well as in scientific and experimental research on complexity has not yet been fully adopted by narratology By integrating cutting edge approaches this volume

takes a step toward filling this gap and establishing interdisciplinary narrative research on complexity Narrative Complexity provides a framework for a more complex and nuanced study of narrative and explores the experience of narrative complexity in terms of cognitive processing affect and mind and body engagement Bringing together leading international scholars from a range of disciplines this volume combines analytical effort and conceptual insight in order to relate more effectively our theories of narrative representation and complexities of intelligent behavior This collection engages important questions on how narrative complexity functions as an agent of cultural evolution how our understanding of narrative complexity can be extended in light of new research in the social sciences and humanities how interactive media produce new types of narrative complexity and how the role of embodiment as a factor of narrative complexity acquires prominence in cognitive science and media studies The contributors explore narrative complexity transmitted through various semiotic channels embedded in multiple contexts and experienced across different media including film comics music interactive apps audiowalks and ambient literature

KONSULT Gregory L. Ulmer, 2019-02-02 A motto guiding Gregory L. Ulmer's career is from the poet Basho not to follow in the footsteps of the masters but to seek what they sought The responsibility of humanities disciplines today is to do for the digital apparatus social machine what the classical Greeks did for alphabetic writing Ulmer frames online learning as a mode of invention heuristics beginning with the invention of konsult itself Konsult Theopraxis describes the invention of a genre of learning that is to digital media what Plato's dialogue was to alphabetic writing The Greeks invented the practices of writing rhetoric and logic native to the new institution of school the Academy fostering a new behavior of selfhood Socrates Ulmer adopts this historical precedent as a relay an inventory for what must be invented again today a genre of learning an educational institution identity behavior The insight of electracy is that each apparatus augments and institutionalizes one of the primary faculties of human intelligence theoria in literacy praxis in orality poesis in electracy Needed today are not practices of writing but theopraxis of media The analytical information economy of literacy required separation and isolation siloing of institutionalized intelligence The multimodality of electracy enables syncretism of faculties into holistic performance thinking doing making knowledge purpose affect The interface metaphor of Plato's dialogue was an oral conversation during which the illiterate interlocutor is introduced to dialectical reason as Idea The interface metaphor of konsult is scientific consulting during which anelectrate students encounter plasmatic desire as simulacrum This new learning is organized around an updating of Justice native to electracy

Abduction in Context Woosuk Park, 2016-11-23 This book offers a novel perspective on abduction It starts by discussing the major theories of abduction focusing on the hybrid nature of abduction as both inference and intuition It reports on the Peircean theory of abduction and discusses the more recent Magnani concept of animal abduction connecting them to the work of medieval philosophers Building on Magnani's manipulative abduction the accompanying classification of abduction and the hybrid concept of abduction as both inference and intuition the book examines the problem of visual perception

together with the related concepts of misrepresentation and semantic information. It presents the author's views on caricature and the caricature model of science and then extends the scope of discussion by introducing some standard issues in the philosophy of science. By discussing the concept of ad hoc hypothesis generation as enthymeme resolution, it demonstrates how ubiquitous the problem of abduction is in all the different individual scientific disciplines. This comprehensive text provides philosophers, logicians, and cognitive scientists with a historical, unified, and authoritative perspective on abduction.
