A Semiotic Theory of Texts Floyd Merrell, 2019-07-22 No detailed description available for A Semiotic Theory of Texts

A Theory of Semiotics Umberto Eco, 1979 the greatest contribution to semiotics since the pioneering work of C S Peirce and Charles Morris Journal of Aesthetics and Art Criticism draws on philosophy linguistics sociology anthropology and aesthetics and refers to a wide range of scholarship raises many fascinating questions Language in Society a major contribution to the field of semiotic studies Robert Scholes Journal of Aesthetics and Art Criticism the most significant text on the subject published in the English language that I know of Arthur Asa Berger Journal of Communication Eco's treatment demonstrates his mastery of the field of semiotics It focuses on the twin problems of the doctrine of signs communication and signification and offers a highly original theory of sign production including a carefully wrought typology of signs and modes of production *Maupassant: the Semiotics of Text* Algirdas Julien Greimas, 1988-01-01 Translated by Paul Perron

Maupassant's short story Two Friends is examined in order to test methodological tools and to hone them for their application in the analysis of narrative discourse starting from the oral tale Propp and ending with the written tale instituted as literary genre Complex procedures of textual production are identified among which entire sequences as well as the evenemential level of narrative fade away in favor of its cognitive dimension This semiotic investigation is accompanied by a challenge to certain conventions of literary criticism dialogue the locus of Realist stereotypes appears laden with paradoxical truths the description of nature inherited from the Romantics bristles with narrative intent and entire sections of a valorized figurative universe unfold before us Thematic readings are linked up with semantic analysis the figure of Water exerts its profound fascination A Christian symbolics is uncovered which traverses the text and invites us to read it as a new Gospel Parable New readings complement older ones and remain as so many suspended possibilities The tale appears somewhat as a sonnet that is to say as a fixed form genre where the closure of the text would be a necessary condition for transcending it

A Theory of General Semiotics Abraham Solomonick, 2015-09-10 This book is devoted to the topic of general semiotics It formulates some of the central laws and parameters of the paradigm of general semiotics and illustrates them with various examples from branch semiotics from the systems of semiotics of that are already in use in particular fields of endeavour These laws and illustrations will prove useful for every distinct instance of branch semiotics both those that are already well established and those that will appear in the future **A (Bio)Semiotic Theory of Translation** Kobus Marais, 2018-10-25 This volume outlines a theory of translation set within the framework of Peircean semiotics which challenges the linguistic bias in translation studies by proposing a semiotic theory that accounts for all instances of translation not only interlinguistic translation In particular the volume explores cases of translation which does not include language at all The book begins by

examining different conceptualizations of translation to highlight how linguistic bias in translation studies and semiotics has informed these fields and their development The volume then outlines a complexity theory of translation based on semiotics which incorporates process philosophy semiotics and translation theory It posits that translation is the complex systemic process underlying semiosis the result of which produces semiotic forms The book concludes by looking at the implications of this conceptualization of translation on social cultural emergence theory through an interdisciplinary lens integrating perspectives from semiotics social semiotics and development studies Paving the way for scholars to analyze translational aspects of all semiotic phenomena this volume is essential reading for graduate students and researchers in translation studies semiotics multimodal studies cultural studies and development studies

Theory and Methodology of Semiotics Alexandros Ph. Lagopoulos, Karin Boklund-Lagopoulou, 2020-11-23 The book is an in depth presentation of the European branch of semiotic theory originating in the work of Ferdinand de Saussure It has four parts a historical introduction the analysis of langue narrative theory and communication theory Part I briefly presents all the semiotic schools and their main points of reference Although this material is accessible in many other Anglophone publications the presentation is marked by specific choices aiming to display similarities and differences The analysis of langue in Part II is also available in Anglophone bibliography but the book presents Saussurean theory according to a new theoretical rationale and enriched with later developments In addition it is orientated so as to offer the foundation for the part that follows Part III is a presentation of Greimasian narrative theory well documented in Francophone bibliography but poorly represented in Anglophone publications The presentation extends the theory in both a qualitative and a new quantitative direction and includes a great number of examples and two extended textual analyses to help the reader understand and apply it Part IV communication theory combines an extension of Greimasian sociosemiotics with other schools of thought This original theoretical section discusses fourteen consecutive communication models the synthesis of which results in a holistic social semiotic theory of communication

Structure of Texts and Semiotics of Culture Jan van der Eng, Monéir Grygar, 2018-11-05 No detailed description available for Structure of Texts and Semiotics of Culture

A Buddhist Theory of Semiotics Fabio Rambelli, 2013-03-14 One of the first attempts ever to present in a systematic way a non western semiotic system This book looks at Japanese esoteric Buddhism and is based around original texts informed by explicit and rigorous semiotic categories It is a unique introduction to important aspects of the thought and rituals of the Japanese Shingon tradition Semiotic concerns are deeply ingrained in the Buddhist intellectual and religious discourse beginning with the idea that the world is not what it appears to be which calls for a more accurate understanding of the self and reality This in turn results in sustained discussions on the status of language and representations and on the possibility and methods to know reality beyond delusion such peculiar knowledge is explicitly defined as enlightenment Thus for Buddhism semiotics is directly relevant to salvation this is a key point that is often ignored even by Buddhologists This book discusses in depth the main

elements of Buddhist semiotics as based primarily on original Japanese pre modern sources It is a crucial publication in the fields of semiotics and religious studies
