Separate Creation The Search For The:

The Advocate ,1996-06-11 The Advocate is a lesbian gay bisexual transgender LGBT monthly newsmagazine Established in 1967 it is the oldest continuing LGBT publication in the United States *Science, Scripture, and Homosexuality* Alice Ogden Bellis,Terry L. Hufford,2011-01-01 The collaborative work of a biblical scholar and a biology professor Science Scripture and Homosexuality addresses scripture passages relating to homosexuality and explains the foundation of genetics and the growing evidence suggesting an organic basis for sexual orientation The authors argue that the role of the homosexual as well as the heterosexual within the Church should be based upon common criteria for all Written in a highly accessible manner the book is ideal for congregational discussion The Sound of Bells Norah Moore,2013 This book brings together the teachings of Meher Baba and the teachings of Carl Gustav Jung for the first time Many people would wish to bring together their inner experience of spirituality and psychological development Meher Baba did not come to bring a new religion but a philosophy that brought all religions together In this first book The Sound of Bells and Eastern Mysticism I looked at C G Jung s Analytical Psychology in the light of Meher Baba s book God Speaks In the second book of the trilogy Glowing Embers for the New Humanity God can only be Lived I brought a more detailed account of how this might be accomplished In the final book of the trilogy I turned to a more personal account of how I followed this path myself and summed up how the path has been followed throughout all the avataric ages **Do Ask, Do Tell** Bill Boushka,2000 The original Bill of Rights sponsored largely by James Madison is now about 210 years old Reinforced by the Fourteenth Amendment which eventually applied many of its provisions to the states it has served us well It is time to re evaluate our fundamental constitutional rights and to seriously consider their major renovation This is my central proposal Are we ready to trust ourselves as individuals with the personal responsibilities that go with rights When government defines personal moral values we tend to take less account for not only our own actions but also our own underlying values for those spiritual yearnings that make us all unique people who we are We tend to lose interest in speaking for ourselves and tend to leave moral judgments to experts who get paid to pass judgment on all of us I discuss a philosophy often called libertarianism of extremely restricted government I present it from the personal perspective of a gay man who grew up in a period of enormous change and migration toward cultural individualism My argument is intended for everyone but I provide my own detailed perspectives on many issues The parallel between draft deferments during the Vietnam era and the gays in the military battle today How close the gay community as we know it came to total catastrophe during the early days of AIDS crisis What the family values debate is really all about Volunteerism and social obligations and how both military service and parenting fit into these What discrimination is really all about How the Don t Tell mentality interferes with political and social debate in many areas Why equal rights for gays is important for everybody A science of personal growth and why libertarianism is good for personal growth **Computational Literacy for the Humanities** Zef Segal,Nurit

Melnik,2025-06-23 Computational Literacy for the Humanities provides an introduction to mathematics and programming that is specifically designed for use by those engaged in the humanities Linking mathematical concepts and computational skills the chapters in this book explore humanistic questions from diverse fields such as art history and literature The book helps to advance computational and digital literacy by showing that each mathematical concept has a history and each technique has a meaning Rather than viewing mathematics and computer programming as purely instrumental they are integrated into the process of achieving greater understanding of humanistic phenomena Algorithms data statistics and networks are taught critically within the book whilst the authors also make a concerted effort to expose the internal biases of these tools They also demonstrate the applicability of quantification and computation for the promotion of diversification and inclusivity within the humanities All exercises are designed as an opportunity to gain hands on mathematical and computational experience whilst critically exploring and interpreting humanistic phenomena Computational Literacy for the Humanities shows readers how to engage with data in a way that is challenging yet meaningful and empowering It will be of interest to scholars and students working across the humanities and should be of particular interest to those working in digital humanities

At the End of Time Robin Robertson,2011-05-01 Many cycles predicting the end of times fill our modern dialog from the coming of the Millennium to 2012 Robin Robertson helps to clarify these prophecies and offers insight into the central issues of our challenges and the experience and their life changing implications For eighteen hundred years the prophecies in the Book of Revelation have captured the collective Western imagination Saint John s rich imagery and the dramatic urgency of the looming disasters he predicts have both fascinated and frightened us with its apparent message that the end of time is near Robin Robertson Ph D deciphers the mystical theology and visions of the prophets seers and shamans His analysis incorporates the insights of modern mathematics and Chaos Theory as well as his personal insights gained through his work as a Jungian therapist and teacher Robertson holds a mirror to humanity s need to know Self and God He explains that Saint John s vision foretells the massive change in consciousness that is happening in our time

Learning Python Mark Lutz,2025-02-25 Get a comprehensive in depth introduction to the core Python language with this hands on book Based on author Mark Lutz s popular training course this updated sixth edition will help you quickly write efficient high quality code with Python It s an ideal way to begin whether you re new to programming or a professional developer versed in other languages Complete with quizzes exercises and helpful illustrations this easy to follow self paced tutorial gets you started with Python 3.12 and all other releases in use today With a pragmatic focus on what you need to know it also introduces some advanced language features that have become increasingly common in Python code This book helps you Explore Python s built in object types such as strings lists dictionaries and files Create and process objects with Python statements and learn Python s syntax model Use functions and functional programming to avoid redundancy and maximize reuse Organize code into larger components with modules and packages Code robust programs with Python s

exception handling and development tools Apply object oriented programming and classes to make code customizable Survey advanced Python tools including decorators descriptors and metaclasses Write idiomatic Python code that runs portably across a wide variety of platforms

Scientific and Religious Habits of Mind Ron Good,2005 The open inquiring nature of science is fundamentally incompatible with the closed authoritarian nature of most religious training Reasons for rejection of personal god concepts by Charles Darwin Albert Einstein and Bertrand Russell are used by this author to underline this incompatibility and to show how each of these important scientists came to reject organized religion Conflicts between scientific and religious habits of mind are described and ideas for education are offered Common assumptions about our natural environment and human nature are shown to be obstacles to scientific literacy and to a sound liberal education Research on the nature of the relationship between scientific and religious habits of mind is proposed recognizing the potential incompatibilities between these important influences in society

Phenomenology/Ontopoiesis Retrieving Geo-cosmic Horizons of Antiquity Anna-Teresa Tymieniecka,2011-08-10 The controversy of flux and stasis as the groundwork of reality of Greek ancient philosophy reached its crux in the all encompassing doctrine of the logos by Heraclitus of Ephesus It centers upon human soul in its role with the cosmos Philosophy of the Occident corroborating Greek insights with the progress of culture in numerous interpretations Kant Kierkegaard Husserl Merleau Ponty Ricoeur presented in this collection has neglected the cosmic sphere While contemporary development of science revealed its grounding principles papers by Grandpierre Kule and Trutty Coohill the ancient logos fully emerges Thus logos hitherto hidden in our commerce with earth is revealed in its intertwinings with the cosmos through the trajectories of the phenomenology ontoipoiesis of life Tymieniecka The crucial link between the soul and the cosmos in a new geo cosmic horizon is thus being retrieved

Take Back the Word - A Queer Reading of the Bible Robert E. Goss,Mona West,2000-11-15 Perhaps the most revolutionary contribution of Take Back the Word is its presentation of resistant practices of reading the Bible that challenge oppressive applications of Scripture to clobber queer folx If lesbians gay men bisexuals transgender non gender conforming and questioning people are to take back the word of Scripture for themselves they must take it back in a new way Essays examine queer strategies for reading queer ethical models from the Hebrew Scriptures and queer good news stories from the Christian Scriptures
