Serivces In The Transition Economies:

The Development of Services in Transition Economies Carolin Wobben, 2007-11 Seminar paper from the year 2003 in the subject Business economics General grade NN Hamburg University of Economy and Policy course Human Development 18 entries in the bibliography language English abstract It is by now more than a decade ago that the formally centrally planned economies in Central and Eastern Europe have started to transform into market economies when the collapse of the Soviet system was confirmed in 1989 In fact they constitute a unique historical example with a large set of economies undergoing this extremely drastic systemic change within a very short period of time The adoption of a new model based on free market economy supports the rebuilding of one Europe which will benefit from high economic and social growth potential as well as political stability and security One essential characteristic of a free market economy is a high proportion of services Realizing this quality in the transition economies signifies a great challenge as their service sector was extremely underdeveloped in the planned economies In this paper the development of the service sector in the transition economies of Central and Eastern Europe are depicted on the background of the economic characteristics of their socialist past In this portrayal both domestic growth and international trade of services will be accounted for Finally it will be discussed in which way the service sector represents a strong impetus in the fight against unemployment and hence contributes to a sustainable development in the future

Services Policies in Transition Economies Felix Eschenbach, Bernard M. Hoekman, 2006 The authors analyze the extent to which the EU 15 and 16 transition economies used the WTO General Agreement on Trade in Services GATS to commit to service sector policy reforms They compare GATS commitments with the evolution of actual policy stances over time While there is substantial variance across transition economies on both actual policies and GATS commitments the authors find an inverse relationship between the depth of GATS commitments and the quality of actual services policies as assessed by the private sector In part this can be explained by the fact that the prospect of EU accession makes GATS less relevant as a commitment device for a subset of transition economies But for many of the non EU accession candidates the WTO seems to be a weak commitment device One explanation is that the small size of the markets concerned generates weak external enforcement incentives The authors findings suggest greater collective investment by WTO members in monitoring and the need for transparency to increase the benefits of WTO membership to small countries World Bank web site

Structure And Performance Of The Services Sector In Transition Economies Ana M. Fernandes, 2007 **Services in the Transition Economies** M. M. Kostecki, András Feférvary, 1996 Service activities such as banking insurance telecommunications and other services have been at the forefront of the transformation process in East Central Europe and former Soviet Union This volume uses case studies field research and industry studies to consider strategic options for Foreign Service firms in East Central and Eastern Europe [The Handbook of Service Industries](#) J. R. Bryson, P. W. Daniels, 2007-01-01 It contains an impressive array of important and useful material that should be familiar to anyone

interested in economic growth and change the potential value to be gained from these collected works is great James E Pratt

Growth and Change Service activities are now acknowledged as key players in economic development societal change and public policy worldwide This exciting Handbook not only contributes to ongoing conceptual debates about the nature of service led economies and societies it also pushes back the frontiers of current critical thinking about the role of service activities in urban and regional development and the important research agendas that remain to be addressed Drawing on both theory and case studies the contributors are international experts who have written original and stimulating chapters from a number of different disciplinary perspectives Each chapter seeks to raise awareness of and to provoke debates about the opportunities and challenges presented by the shift to service employment Providing a truly interdisciplinary analysis The Handbook of Service Industries will be invaluable to scholars specializing in services research as well as students and researchers in the areas of economics geography business and management sociology public policy and planning The policy making community will also find the Handbook a relevant and useful resource

Hidden Challenges to Education Systems in Transition Economies Sue E. Berryman, 2000-01-01 This book provides diagnostic and strategic analysis of the challenges to educational systems in the transition economies of the Eastern and Central Europe and Central Asia At the outset of the transition many of these countries educational systems had solved problems such as limited access gender inequalities and poor quality outputs that still plague other regions of the world Many policy makers believed that education was not a problem sector in transition countries This report presents originally unforeseen results which suggest that deep and broad problems are emerging in the sector and were threatening many countries achievements in education The region s education systems which once were a good fit with the planned economies and authoritarian political systems are proving to be a poor fit with market economies and more open political systems Inequities in learning opportunities are increasing at a time when human capital is becoming ever more important in the region s recovery and development The danger is that in some countries of the region these

education problems left unchecked could threaten to create a vicious circle that will make poverty and social exclusion a powerful generational inheritance

Managing Relationships in Transition Economies Nancy K. Napier,David C. Thomas,2004-02-28 The transition from socialist or communist economy to market economy in many countries has been dramatic unpredictable and mostly on the surface observable in new consumption patterns or higher standards of living But deeper change in the managerial mindset in these new market economies has been much slower and less evident It is crucial to business success for foreign managers to understand their transition economy counterparts This book examines the interactions that foreign and transition economy managers have in building business relationships the influences behind those interactions how the interactions themselves change over time and how to manage the process of building relationships more smoothly
