Serpent And The Sacred Fire Fertility Images In Southwest Rock Art:

The Serpent and the Sacred Fire Dennis Slifer, 2000 The Southwest holds a treasure trove of prehistoric rock art the fascinating images of petroglyphs and pictographs spanning thousands of years of Indian culture Fertility has been identified as one of the most obvious and persistent themes in rock art the record resplendent with symbols of birth death and procreation Three time rock art author Dennis Slifer takes a wide and deep look at symbols of fertility and fecundity meticulously documenting drawings made by prehistoric cultures and the historical tribes of today s greater Southwest and comparing the symbols with those fertility symbols found in rock art sites around the world **Ambiguous Images** Kelley Hays-Gilpin, 2004 What does rock art say about gender and how can our understanding of gender shape the way that we view rock art A significant contribution to the relatively unexplored field of gender in rock art this volume contains a wealth of information for archaeologists anthropologists and art historians interested in past gender systems Hays Gilpin argues that art is at once a product of its physical and social environment and at the same time a tool of influence in shaping behavior and ideas within a society Taking this stance rock art is shown to be very often one of the strongest lines of evidence available to scholars in understanding ritual practices gender roles and ideological constructs of prehistoric peoples Subsequently issues of representation and the people who made these forms of art are also discussed **Discovering North American Rock Art** Lawrence L. American Landscapes Cheryl Claassen, 2024-01-12 This collection of essays focuses on what Cheryl Claassen terms the multi vocal landscape the idea that different groups and genders look upon the same natural features but perceive different meanings and potential in what they are seeing Through ten chapters various contributors showcase the ways in which native peoples see and interact with the natural world At the heart of this book is the idea that Europeans associated nature with the feminine and saw the natural world as a passive frontier to be dominated Native Americans however looked at landscape differently They saw nature as a place in which to engage in complex negotiations between spirits and humans This approach to nature cemented a relationship to the land based more on a partnership rather than subjugation These essays deepen our understanding of the interaction between native people and the land While other books focus on the gendered gaze of European men upon the landscape this collection emphasizes that native men and native women looked upon natural formations and constructed landscapes differently from one another a difference in perception that is important for archaeologists and anthropologists to understand While there have been advances toward admitting this more complex view in the rest of the world Native American Landscapes is the first to focus on how native men and women viewed the world around them Native American Landscapes is organized by region taking readers across the country from the rock shelters of the Cumberland Plateau in the east to the Mojave Desert and the Mexican Gulf Coast then north to what is now British Columbia and farther west to Hawaii Readers of this collection through a study of creation myths vision quests fertility shrines and other ritualized uses of landscape will learn more about the land and about humans perception of our natural surroundings which forms the bedrock of our present relationship with the natural world CHERYL CLAASSEN is professor of anthropology at Appalachian State University She is the author or editor of six books on Native American prehistory including Feasting with Shellfish in the Southern Ohio Valley Shells Rituals and Beliefs in Archaic North America and Women in Prehistory North America and Mesoamerica

New Perspectives on Prehistoric Art Günter Berghaus, 2004-04-30 Following the discovery of Franco Caribbean cave art in the nineteenth century standard interpretations of these works usually revolved around hunting magic and fertility cults Orthodox positions such as these have weighed heavily on later generations of art historians archaeologists and anthropologists even those whose views dissented from those of their predecessors In the last few decades however new approaches to cave art often based on discoveries made in Africa Asia Australia North America and the Arctic region have produced new insights into possible meanings and functions of prehistoric paintings and sculptures This new collection of essays explores these insights gathering the observations of eight experts from a variety of disciplines and

examining some of the social and spiritual functions of a variety of artistic genres ranging from 40 000 B C to 5 000 B C
These insights which derive from evolutionary biology feminist scholarship ritual studies and new modes of anthropology
argue collectively that prehistoric art was a culture specific form of communication that should be interpreted in the social
context of early hunter gatherer societies and should not be measured with the criteria and paradigms of modern art
