Across The Green Sea Sanjay Subrahmanyam, 2024-07-02 Beginning in the mid fifteenth century the regions bordering the western Indian Ocean the green sea as it was known to Arabic speakers underwent vast transformation An era of commercial and cultural exchange blossomed between the Red Sea and Mecca the Persian Gulf East Africa Kerala and western India In *Across the Green Sea* Sanjay Subrahmanyam recounts the history of this ocean from a variety of shifting viewpoints He sets the scene with the withdrawal of China's Ming Dynasty and explores how the western Indian Ocean was transformed by the growth and increasing prominence of the Ottoman Empire and the continued spread of Islam into East Africa He examines how several cities including Mecca and the vital Indian port of Surat grew and changed during these centuries when various powers interacted until famines and other disturbances upended the region in the seventeenth century Rather than proposing an artificial model of a dominant centre and its dominated peripheries *Across the Green Sea* reveals the complexity of a truly dynamic and polycentric system through the use of connected histories a method which he has pioneered

Imagined Geographies Geoffrey C. Gunn, 2021-09-03 *Imagined Geographies* is a pioneering work in the study of history and geography of the pre 1800 world In this book Gunn argues that different regions astride the maritime silk roads were not only interconnected but can also be construed as imagined geographies Taking a grand civilizational perspective five such geographic imaginaries are examined across respective chapters namely Indian Arabic Chinese Japanese and European including an imagined Great South Land Drawing upon an array of marine and other archaeological examples the author offers compelling evidence of the intertwining of political cultural and economic regions across the sea silk roads from ancient times until the seventeenth century Through a thorough analysis of these five geographic imaginaries the author sets aside purely national history and looks at the maritime realm from a broader spatial perspective He challenges the Eurocentric concept of center and periphery and establishes a revisionist view on a decentered world regional

history This book will definitely interest history lovers from all around the world who wants to know more about how their forebears viewed their respective region and how their region fits into world history with local uniqueness Gunn takes large themes and makes them understandable He is not afraid to make the grand statement and to look at the sweep of history all in one arc I admire that greatly this is not history for the faint of heart But it is history well done and history that can show the forest from the trees Eric Tagliacozzo John Stambaugh Professor of History Cornell University This is one of the most ambitious and insightful books that I have read on pre Modern maritime Asia The author offers fascinating perspectives on how this vast region was imagined charted and experienced over many centuries That requires mastery of an immense range of scholarship and primary sources His aim is to knit this watery world together into a conceptual whole This mission is accomplished with style and discipline Andrew R Wilson John A van Beuren Chair of Asia Pacific Studies U S Naval War College

Revival: A History of Modern Culture: Volume II (1934) Preserved Smith,2018-01-16 The understanding of history can be advanced only by the combination or alternation of analysis and synthesis Detailed research and generalizing survey are not antiethical but complementary For a long time however the specialist has reigned supreme in our schools The need is now surely for a return to synoptic writing The present work was undertaken to supply the need of a synthesis It is a map of a large region not a geological chart of a square mile or the plan of a single city Its value if any lies in its view of the interrelations of large tracts of social and intellectual life not in the intensive investigation of narrow fields

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office,1968 **Catalogue of the Public School Library of the City of Adrian, Michigan** Adrian (Mich.) Board of education,1891 **The Global History of Organic Farming** Gregory A. Barton,2018-02-09 Organic farming is a major global movement that is changing land use and consumer habits around the world This book tells the untold story of how the organic farming movement nearly faltered after an initial flurry of scientific interest and popular support Drawing on newly unearthed archives Barton argues that organic farming first gained popularity in an imperial milieu before shifting to the left of the political spectrum after decolonization and served as a crucial middle stage of environmentalism Modern organic protocols developed in British India under the guidance of Sir Albert Howard before spreading throughout parts of the British Empire Europe and the USA through the advocacy of his many followers and his second wife Louise Organic farming advocates before and during World War II

challenged the industrialization of agriculture and its reliance on chemical fertilizers They came tantalizingly close to influencing government policy The decolonization of the British Empire the success of industrial agriculture and the purging of holistic ideas from medicine side lined organic farming advocates who were viewed increasingly as cranks and kooks Organic farming advocates continued to spread their anti chemical farming message through a small community that deeply influenced Rachel Carson s ideas in Silent Spring a book that helped to legitimize anti chemical concerns The organic farming movement re entered the scientific mainstream in the 1980s only with the reluctant backing of government policy It has continued to grow in popularity ever since and explains why organic farming continues to inspire those who seek to align agriculture and health

From Mountain Fastness to Coastal Kingdoms John Deyell, Rila Mukherjee, 2019-08-09 Money is central to the functioning of economies yet for the pre modern period our knowledge of monetary systems is still evolving Until recently historians of the medieval world have conflated the use of coins with a high degree of monetization States without coinage were considered under monetized It is becoming more evident however that some medieval states used money in complex ways without using coinage Moneys of account supplanted coins wholly or in part But there is an imbalance of evidence coins survive physically while intangible forms of money leave little trace This has skewed our understanding Since coin usage has been well studied in the past these essays flesh out our consideration of societies that used money but struck no coins Absence or shortage of coining metals was not the causative factor some of these societies had access to metal supplies but still remained coinless Was this a strategic choice Does it reflect the unique system of governance that developed in each kingdom It is surely time to unravel this puzzle This book examines money use in the Bay of Bengal world using the case of medieval Bengal as a fulcrum Situated between mountains and the sea this region had simultaneous access to both overland and maritime trade routes How did such cashless economies function internally within their regions and in the broader Indian Ocean context This volume brings together the thoughts of a range of upcoming scholars and a sprinkling of their elders on these and related issues Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

Empire in Asia: A New Global History Brian P. Farrell, Donna Brunero, 2018-09-20 Asia was the principle focus of empire builders from Alexander and Akbar to Chinggis Khan and Qianlong and yet until now there has been no attempt to provide a comprehensive history of empire in the region Empire in Asia addresses the need for a thorough survey of the topic This volume covers the long 19th century commonly seen in terms of high imperialism and the global projection of Western power This volume explores the dynamic volatile and often contested processes by which by the early years of the 20th century Asian states space and peoples became deeply integrated into the wider dynamics of global reordering Drawing on case studies from across Asia the contributors discuss key themes including ideology concepts of identity religion and politics state building and state formation the relationships between space people and sovereignty the movements of goods money people and ideas and the influence and impact of

conflict and military power The two volumes of *Empire in Asia* offer a significant contribution to the theory and practice of empire when considered globally and comparatively and are essential reading for all students and scholars of global imperial and Asian history *The History of the U.S. Army Medical Service Corps* Richard V.
