Landsburg,2024-03-22 Price Theory and Applications challenges students to master the economic way of understanding the world with equal emphasis on intuition and precise logic and special emphasis on the interplay between them The writing is inviting humorous and sometimes folksy without sacrificing the insistence that arguments need to be airtight Important concepts are introduced via entertaining examples and fleshed out with rigor The learning experience is supported by a vast number of intriguing and entertaining exhibits examples numerical exercises and problem sets some integrated within the text and others included at the end of chapters The problems vary widely in their demands on students some are straightforward applications of the theory while others require a great deal of creativity and a willingness to think considerably outside the box *The Economics of Crime* Zagros Madjd-Sadjadi,2013-11-01 Too often students in economics emerge with a clear grasp of theory but precious little ability to

apply that theory especially in the area of microeconomics They are left with a model that they believe is relevant solely to market mechanisms when it is in fact suited for inquiry into all avenues of rational choice At the same time there is a uniform belief that criminals are plagued by psychological physiological or sociological deficiencies that can be remedied only through incarceration or institutionalization Neither formulation is satisfactory as an exemplar to the general population about how they should be thinking about crime Workers employers and managers alike have a stake in effective public policy designed to reduce criminality According to the Institute for People with Criminal Records approximately 3% of the US population will be in jail or prison for at least one day during any given year and nearly 30% of the population has a criminal record Yet having a criminal record often serves as a bar to employment and leads individuals who have paid their debts to society on a pathway to recidivism Thus everyone from managers in companies considering whether to bar felons from employment to individual voters considering felony disenfranchisement laws needs to understand how rational criminals act and think This book will attempt to guide readers to such an understanding By understanding how incentive mechanisms affect criminal behavior business managers may use this information either to reduce criminal activity in their own enterprises or to understand how unethical business decisions affect the wider society As we always do in such circumstances we must make sacrifices to balance the competing interests      *Genreflecting* Diana Tixier Herald, Samuel Stavole-Carter, 2019-05-24 Librarians who work with readers will find this well loved guide to be a treasure trove of information With descriptive annotations of thousands of genre titles mapped by genre and subgenre this is the readers advisor s go to reference Next to author genre is the characteristic that readers use most to select reading material and the most trustworthy consideration for finding books readers will enjoy With its detailed classification and pithy descriptions of titles this book gives users valuable insights into what makes genre fiction appeal to readers It is an invaluable aid for helping readers find books that they will enjoy reading Providing a handy roadmap to popular genre literature this guide helps librarians answer the perennial and often confounding question What can I read next Herald and Stavole Carter briefly describe thousands of popular fiction titles classifying them into standard genres such as science fiction fantasy romance historical fiction and mystery Within each genre titles are broken down into more specific subgenres and themes Detailed author title and subject indexes provide further access As in previous editions the focus of the guide is on recent releases and perennial reader favorites In addition to covering new titles this edition focuses more narrowly on the core genres and includes basic readers advisory principles and techniques      **California Decisions** California. Supreme Court, 1925      The Ethics of Capital Punishment Matthew H. Kramer, 2011-12-15 Taking a fresh look at a central controversy in criminal law theory The Ethics of Capital Punishment presents a rationale for the death penalty grounded in a theory of the nature of evil and the nature of defilement Original unsettling and deeply controversial it will be an essential reference point for future debates on the subject      Man-Leopard Murders David Pratten, 2007-06-19 This book is an account of murder and politics in

Africa and an historical ethnography of southern Annang communities during the colonial period Its narrative leads to events between 1945 and 1948 when the imperial gaze of police press and politicians was focused on a series of mysterious deaths in south eastern Nigeria attributed to the man leopard society These murder mysteries reported as the biggest strangest murder hunt in the world were not just forensic but also related to the broad historical impact of commercial Christian and colonial aid relations on Annang society Dead by Midnight LP Carolyn Hart,2011-03-29 Solving puzzles comes naturally to Annie Darling cheerful owner of the Death on Demand mystery bookstore on the lovely sea island of Broward s Rock Annie is aided and abetted by her admiring husband Max who runs an unusual business that offers help to people in trouble A recent death appears to be suicide but Annie suspects murder To solve the case she unravels the mystery of a towel hidden at midnight in a gazebo the lack of fingerprints on a crystal mug blood on a teenager s blue shirt and the secret of a lovers tryst Annie believes she has set the perfect trap for a merciless killer until her cell phone rings and Death whispers in her ear

*The Economics of Sin* Samuel Cameron,2002-01-01 This work examines the definition and evolution of sin from the perspective of rational choice economics The author argues that because engaging in activities deemed to be sinful is an act of choice it can therefore be subject to the logic of choice in the economic model *Crime Writers* Elizabeth Haynes,2011-01-19 This invaluable resource provides information about and sources for researching 50 of the top crime genre writers including websites and other online resources *Crime Writers A Research Guide* is an easy to use launch pad for learning more about crime fiction authors including those who write traditional mystery novels suspense novels and thrillers with crime elements Emphasizing the best and most popular writers the book covers approximately 50 contemporary authors plus a few classics like Agatha Christie Each entry provides a brief quotation that gives some indication of writing style a biographical sketch lists of major works and awards and research sources including websites biographies criticism and research guides There are also read alike for selected authors Of special note is the inclusion of websites and other online resources such as blogs and social networking sites which are often overlooked in author reference sources The book also provides an overview of the genre and subgenres a timeline and a comprehensive bibliography An ideal resource for genre studies and literature classes this guide will also be invaluable to readers advisors book club leaders students and genre fans
