Natural Law Ethics in Theory and Practice Joseph Boyle, 2020-08-07 Natural Law Ethics in Theory and Practice brings together a selection of essays of the late Joseph Boyle Boyle was with Germain Grisez and John Finnis a founder and developer of the New Classical Natural Law Theory arguably the most important development in Catholic moral philosophy of the twentieth century While this theory is indebted to the work of St Thomas Aquinas it incorporates an understanding and assessment of that work that is different from that found in other statements of natural law Boyle made crucial contributions to a wide variety of aspects of this theory and the volume is divided into two parts Part One Articulating a Theory of Natural Law contains three sections in which Boyle defends the reality of free choice and the view that the basic reasons for action or first principles of natural law are incommensurable in goodness Boyle identifies the basic moral standard for choice and action and develops an account of human action that elucidates the important role played by intention and double effect in their moral evaluation The essays in Part Two Natural Law Theory and Contemporary Moral Problems demonstrate the strength and scope of Boyle's natural law account as he brings it to bear upon just war theory property and welfare rights and issues in bioethics The essays in bioethics address the difficult question of whether it is appropriate to tube feed patients in persistent vegetative state and include an unpublished essay Against Assisted Death which he delivered as the Anscombe Lecture at The Anscombe Bioethics Centre in Oxford about a year before he died This volume also includes a Foreword by Princeton's Robert P George an Introduction by the editors that highlights Boyle's contribution to the development of the new classical natural law theory and a bibliography of Boyle's publications

After the Natural Law John Lawrence Hill, 2016-02-08 The natural law worldview developed over the course of almost two thousand years beginning with Plato and Aristotle and culminating with St Thomas Aquinas in the thirteenth century This tradition holds that the world is ordered intelligible and good that there are objective moral truths which we can know and that human beings can achieve true happiness only by following our inborn nature which draws us toward our own perfection Most accounts of the natural law are based on a God centered understanding of the world After the Natural Law traces this tradition from Plato and Aristotle to Thomas Aquinas and then describes how and why modern philosophers such as Descartes Locke and Hobbes began to chip away at this foundation The book argues that natural law is a necessary foundation for our most important moral and political values freedom human rights equality responsibility and human dignity among others Without a theory of natural law these values lose their coherence we literally cannot make sense of them given the assumptions of modern philosophy Part I of the book traces the development of natural law theory from Plato and Aristotle through the crowning achievement of Thomas Aquinas Part II explores how modern philosophers have systematically chipped away at the only coherent foundation for these values As a result our most important moral and political ideals today are incoherent Modern political and moral thinkers have been led either to dilute the meaning of such terms as freedom or the moral good or abandon these ideas altogether Thus modern philosophy and political thought are leading us either toward anarchy or totalitarianism The conclusion entitled Why God Matters shows how even the philosophical assumptions of the natural law depend on a personal God
