James Cowles Prichard's Anthropology Hannah Franziska Augstein, 1999 The Bristol doctor James Cowles Prichard 1786 1848 has enjoyed a glowing reputation Late Victorians regarded him as the founder of British anthropology and in the twentieth century he has been considered as a precursor of Darwin Nowadays his name is cited mainly in context of inquiries into the rise of racial theories Prichard's own theoretical goal was simple the son of Quaker parents he attempted to establish that the Bible provided a correct account of the earliest history of humankind above all it was his aim to prove once and for all the doctrine of monogenesis the unitary origins of mankind He single handedly charted the waters of the pre Victorian human sciences Philology anthropology mythology Biblical criticism the philosophy of the human mind comparative anatomy physiology and practical medicine Prichard mastered subjects so diverse that his learning may be called truly universal His views have often been misrepresented however and his opposition to racial thinking in particular has been underestimated This book the first study dedicated exclusively to Prichard explores his notions of man's place in nature and puts them in the context of contemporary European learning
