Naturalistic Behavior of Nonhuman Primates Clarence Ray Carpenter, 1965 Since 1950 there has been a sharp increase in interest among comparative anatomists physiologists biochemists ecologists and behavioral scientists in research on non human primates Recent advances in the study of genetics evolution and human prehistory have focused scientific attention on man s close relatives the apes and monkeys At the same time the value of the naturalistic field study as a research tool and an adjunct to laboratory study has been increasingly recognized This book brings together for the first time eight classic naturalistic field studies of non human primates that have long been out of print Because these pioneer investigations in primatology have been unavailable contemporary scientists have undertaken research into many naturalistic behavior characteristics originally observed and described by the author in the 1930 s and 1940 s His basic monographs on the howler monkeys of Panama the gibbons of Thailand the orangutans of Sumatra and other monkey colonies are included as well as discussions of the significance of the results of his research for human behavioral adaptations These important monographs with new introductions and conclusions by the author will not only be of extreme interest to psychologists zoologists ecologists anthropologists and other life scientists but will also help to advance the scientific productivity of current field investigations

Naturalistic Behavior of Nonhuman Primates Jessie Bernard, 1964

Primate Ethology Pendleton Herring, 2017-07-05 This is a groundbreaking work which brought together studies of monkeys and apes from both the laboratory and the field Many broad aspects of primate life including facial expressions sexual signals grooming play social organization and parental care are covered by the contributors and provided a whole new approach to primate behavior

Naturalistic Environments in Captivity for Animal Behavior Research Edward F. Gibbons, 1994-01-01 This book addresses theoretical and pragmatic issues concerning naturalistic environments in captivity for animals The multidisciplinary orientation of the volume will help regulatory personnel administrators and researchers to understand each other s roles and

responsibilities in the design construction and real time operation of these facilities The book also highlights the important value of naturalistic environments in captivity to the scientific study of animal behavior The authors provide insights into identifying physical environmental features not in compliance with existing regulations and that may have a negative impact on the physical health and psychological well being of animals Socioecology and Psychology of Primates Russell H. Tuttle,2011-06-03 No detailed description available for Socioecology and Psychology of Primates **Primate Behavioral Ecology** Karen B. Strier,2016-08-25 This comprehensive introductory text integrates evolutionary ecological and demographic perspectives with new results from field studies and contemporary noninvasive molecular and hormonal techniques to understand how different primates behave and the significance of these insights for primate conservation Each chapter is organized around the major research themes in the field with Strier emphasizing the interplay between theory observations and conservation issues Examples are drawn from the classic primate field studies as well as more recent studies on previously neglected species illustrating the vast behavioral variation that exists across the primate order Primate Behavioral Ecology 5th Edition also examines how anthropogenic activities are negatively impacting primate populations including a thorough analysis of behavioural plasticity and its implications This fully updated new edition incorporates exciting new discoveries and the most up to date approaches in the field to provide an invaluable overview of the field of primate behavioral ecology and its applications to primate conservation It is considered to be a must read for all students interested in primates Naturalistic Behavior of Nonhuman Primates Y C.R. Carpenter C. R. Carpenter,1964 The Predatory Behavior of Wild Chimpanzees Geza Teleki,1973 Geza Teleki has spent two years observing wild chimpanzees at very close quarters in the Gombe National Park of Tanzania He has compiled this report on predatory behavior based in part upon a decade of observations by a research team living in the park but primarily upon numerous episodes he observed since early 1968 Illustrated *Evolution of Human Behavior* Warren G. Kinzey,1987-01-01 This book represents an important meeting ground in the primatology field by exploring the various primate models that have been used in the reconstruction of early human behavior While some models are based on the proposition that a key behavioral feature such as hunting eating of seeds or monogamous mating led to the evolutionary separation of apes and humans other models suggest that one primate species such as the baboon or chimpanzee best exemplifies the behavior of our early ancestors Several contributors to the book take the position that no single primate is a good model and contend instead that a model must be eclectic One of the more innovative essays suggests that ancestral behavioral states can in fact be derived by comparing the behavior of all living hominid ape and human species Additionally several other contributors analyze and discuss the concept of model making noting deficiencies in earlier models while offering suggestions for future development Although it is true that a powerful conceptual model for reconstructing hominid behavior does not yet exist The Evolution of Human Behavior Primate Models suggests ways one may be constructed based on behavioral ecology and evolutionary theory
