Rogers, 1969 The Nature of Parasitism William Percy Rogers, 1969 **The Balance of Nature and Human Impact** Klaus Rohde, 2013-02-14 It is clear that nature is undergoing rapid changes as a result of human activities such as industry agriculture travel fisheries and urbanisation What effects do these activities have Are they disturbing equilibria in ecological populations and communities thus upsetting the balance of nature or are they enhancing naturally occurring disequilibria perhaps with even worse consequences It is often argued that large scale fluctuations in climate and sea levels have occurred over and over again in the geological past long before human activities could possibly have had any impact and that human effects are very small compared to those that occur naturally Should we conclude that human activity cannot significantly affect the environment or are these naturally occurring fluctuations actually being dangerously enhanced by humans This book examines these questions first by providing evidence for equilibrium and non equilibrium conditions in relatively undisturbed ecosystems and second by examining human induced effects **Physiologic Specialization and the Nature of Parasitism in Colletotrichum Linicolum** Pethyb. & Laff Erwin Schwinghamer, 1954 **The Nature of Parasitism.
