The Nature of the World Walter Terence Stace,1940

Russell's Theory of Perception Sajahan Miah,2006-05-30

In Russell's Theory of Perception Sajahan Miah re-examines and evaluates the development of Russell's concept of perception and the relation of perception to our knowledge of the external world. With the introduction of logical construction in which physical objects are constructed from actual and possible sense data, Russell's theory of perception seems to become a causal theory with phenomenalist overtones. The book argues that there is a consistency of purpose and direction which motivated Russell to introduce logical construction. The purpose was to strike a compromise between his empiricism and his realism and to establish a bridge between the objects of perception and the objects of physics and common sense. **Mystical**

Encounters with the Natural World Paul Marshall,2005-07-07 Some experiences of the natural world bring a sense of unity, knowledge, self-transcendence, eternity, light and love. This is the first detailed study of these intriguing phenomena. Paul Marshall explores the circumstances, characteristics and after-effects of this important but relatively neglected type of mystical experience and critiques explanations that range from the spiritual and metaphysical to the psychoanalytic, contextual and neuropsychological. The theorists discussed include R. M. Bucke, Edward Carpenter, W. R. Inge, Evelyn Underhill, Rudolf Otto, Sigmund Freud, Aldous Huxley, R. C. Zaehner, W. T. Stace, Steven Katz and Robert Forman, as well as contemporary neuroscientists. The book makes a significant contribution to current debates about the nature of mystical experience. **The**

Bloomsbury Encyclopedia of Philosophers in America John R. Shook,2016-02-11 For scholars working on almost any aspect of American thought, *The Bloomsbury Encyclopedia to Philosophers in America* presents an indispensable reference work. Selecting over 700 figures from the *Dictionary of Early American Philosophers* and the *Dictionary of Modern American Philosophers*, this condensed edition includes key contributors to philosophical thought. From 1600 to the present day, entries cover psychology, pedagogy, sociology, anthropology, education, theology, and political science before these disciplines came to be considered distinct from philosophy. Clear and accessible, each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings, and suggestions for further reading. Featuring a new preface by the editor and a comprehensive introduction, *The Bloomsbury Encyclopedia to Philosophers in America* includes 30 new entries on twenty-first century thinkers including Martha Nussbaum and Patricia Churchland. With in-depth overviews of Waldo Emerson, Margaret Fuller, Noah Porter, Frederick Rauch, Benjamin Franklin, Thomas Paine, and Thomas Jefferson, this is an invaluable one-stop research volume to understanding leading figures in American thought and the development of American intellectual history. **Becoming Bamboo** Robert Edgar Carter,1992

The many problems we face in today's world among them war, environmental destruction, religious and racial intolerance, and inappropriate technologies demand that we carefully re-evaluate such issues as our relation to the environment, the nature of progress, ultimate purposes, and human values. These are all issues, Robert Carter explains, that are intimately linked to our perception of life's meaning. While

many books discuss life's meaning either analytically or prescriptively Carter addresses values and ways of meaningful living from a broader perspective using Japanese philosophy to augment his investigation He examines Martin Heidegger's distinction between dwelling and existing in the world Lawrence Kohlberg's stage seven of human moral development and the works of Viktor Frankl Carol Gilligan and Nel Noddings He applies hermeneutic and deconstructionist theory to the question of meaning and explores the feminist contribution to ethics and its relation to the interconnectedness of things celebrated in Zen and Shinto thought Bridging various dichotomies such as East West reason emotion male female and caring justice Carter shows that ethics environmental concern caring and joy in living are dependent on the growth and transformation of the self Only by becoming aware of the interrelatedness of things Carter reveals can we become as supple and as strong as the bamboo tree long the symbol of longevity and constancy
