Nature The Other Earthlings:

Nature James Shreeve, 1991-09-01 *Screening Nature* Anat Pick, Guinevere Narraway, 2013-11-01 Environmentalism and ecology are areas of rapid growth in academia and society at large *Screening Nature* is the first comprehensive work that groups together the wide range of concerns in the field of cinema and the environment and what could be termed posthuman cinema It comprises key readings that highlight the centrality of nature and nonhuman animals to the cinematic medium and to the language and institution of film The book offers a fresh and timely intervention into contemporary film theory through a focus on the nonhuman environment as principal register in many filmic texts *Screening Nature* offers an extensive resource for teachers undergraduate students and more advanced scholars on the intersections between the natural world and the worlds of film It emphasizes the cross cultural and geographically diverse relevance of the topic of cinema ecology

The Palgrave Encyclopedia of the Possible Vlad Petre Glăveanu, 2023-01-25 The Palgrave Encyclopedia of the Possible represents a comprehensive resource for researchers and practitioners interested in an emerging multidisciplinary area within psychology and the social sciences the study of how we engage with and cultivate the possible within self society and culture Far from being opposed either to the actual or the real the possible engages with concrete facts and experiences with the result of transforming them This encyclopedia examines the notion of the possible and the concepts associated with it from standpoints within psychology philosophy sociology neuroscience and logic as well as multidisciplinary fields of research including anticipation studies future studies complexity theory and creativity research Presenting multiple perspectives on the possible the authors consider the distinct social cultural and psychological processes e g imagination counterfactual thinking wonder play inspiration and many others that define our engagement with new possibilities in domains as diverse as the arts design and business

The Human Animal Earthling Identity Carrie P. Freeman, 2020-12 With *The Human Animal Earthling Identity* Carrie P Freeman asks us to reconsider the devastating division we have created between the human and animal conditions leading to mass exploitation injustice and extinction As a remedy Freeman believes social movements should collectively foster a cultural shift in human identity away from an egoistic anthropocentrism human centered outlook and toward a universal altruism species centered ethic so people may begin to see themselves more broadly as human animal earthlings To formulate the basis for this identity shift Freeman examines overlapping values supporting life fairness responsibility and unity that are common in global rights declarations and in the current campaign messages of sixteen global social movement organizations that work on human civil rights nonhuman animal protection and or environmental issues such as Amnesty International Human Rights Watch CARE People for the Ethical Treatment of Animals the World Wildlife Fund the Sea Shepherd Conservation Society the Nature Conservancy the Rainforest Action Network and Greenpeace She also interviews the leaders of these advocacy groups to gain their insights on how human and nonhuman protection causes can become allies by engaging common opponents and activating shared values

and goals on issues such as the climate crisis enslavement extinction pollution inequality destructive farming and fishing and threats to democracy Freeman's analysis of activist discourse considers ethical ideologies on behalf of social justice animal rights and environmentalism using animal rights respect for sentient individuals as a bridge connecting human rights to a more holistic valuing of species and ecological systems Ultimately Freeman uses her findings to recommend a set of universal values around which all social movements campaign messages can collectively cultivate respectful relations between human animal earthlings fellow sentient beings and the natural world we share *Thinking Nature* McGrath Sean J.

McGrath,2020-05-28 Moving between ancient and modern sources philosophy and theology and science and popular culture Sean McGrath offers a genuinely new reflection on what it means to be human in an era of climate change mass extinction and geoengineering Engaging with contemporary thinkers in eco criticism including Timothy Morton Bruno Latour and Slavoj Žižek McGrath argues for a distinctive role for the human being in the universe the human being is nature come to full consciousness McGrath's compelling case for a new Anthropocenic humanism is founded on a reverence for nature a humanism that is not at the expense of nature and a naturalism that is not at the expense of the human **Human-Nature**

Interactions Ieva Misiune, Daniel Depellegrin, Lukas Egarter Vigl,2022-06-30 This edited volume aims to widen the discussion about the diversity of human nature relationships and valuation methods and to stimulate new perspective that are needed to build a more sustainable future especially in face of ongoing socio environmental changes Conceptual and empirical approaches including qualitative quantitative and mixed methodologies have been used to highlight the importance of an integrative understanding of socio ecological systems where healthy ecosystems underpin the quality of life and societal activities largely drive environmental changes Readers will obtain a comprehensive overview of the many and diverse ways the relationships between people and nature can be characterized This includes understanding how people assign values to nature discuss how human nature interactions are shaped and provide examples of how these values and interactions can be systematically assessed across different land systems in Europe and beyond This open access book is produced by internationally recognized scientists in the field but written in an accessible format to be of interest to a large audience including prospective students lecturers young professionals and scientists embarking to the interdisciplinary field of socio ecological research and environmental valuation 4th Edition of International Students Conference—Research in

,2010-01-01 In the New Literatures in English nature has long been a paramount issue the environmental devastation caused by colonialism has left its legacy with particularly disastrous consequences for the most vulnerable parts of the world At the same time social and cultural transformations have altered representations of nature in postcolonial cultures and literatures It is this shift of emphasis towards the ecological that is addressed by this volume A fast expanding field ecocriticism covers a wide range of theories and areas of interest particularly the relationship between literature and other texts and the

environment Rather than adopting a rigid agenda the interpretations presented involve ecocritical perspectives that can be applied most fruitfully to literary and non literary texts Some are more general holistic approaches literature and other cultural forms are a living organism part of an intellectual ecosystem implemented and sustained by the interactions between the natural world both human and non human and its cultural representations Nature itself is a new interpretative category in line with other paradigms such as race class gender and identity A wide range of genres are covered from novels or films in which nature features as the main topic or protagonist to those with an ecocritical agenda as in dystopian literature Other concerns are nature as a cultural construct gendered natures and the city country dichotomy The texts treated challenge traditional Western dualisms human animal man nature woman man While such global phenomena as media old or new tourism and catastrophes permeate many of these texts there is also a dual focus on nature as the inexplicable elusive Other and the need for human agency and global responsibility
