introduction and commentary situating the work in the context of Owen's life and the scientific and intellectual life of the time Sloan pays particular attention to Owen's early relations to the German scientific and philosophical tradition and in this respect contributes to an understanding of the relations between science and British Romanticism In the lectures Owen surveys the history of comparative anatomy up to his time and develops his views on the nature of life species duration physiological function and the relation between embryology and classification One can see the degree to which transcendental anatomy and the views of Von Baer Johannes Müller E G St Hilaire and Cuvier were current in London in the late 1830s from back cover *Lectures on the Science and Art of Education* Joseph Payne, 1880 **Lectures on the Rational System of Society, Derived Solely from Nature and Experience, as Propounded by Robert Owen Versus Socialism, Derived from Misrepresentation, as Explained by the Lord Bishop of Exeter and Others; and Versus the Present System of Society** Owen, 1841 *Lecture on the Nature and Objects of the Modern Philosophy* James Ronaldson Leib, 1830
