The Book of Nature ... Second Edition, Translated from the Sixth German Edition, by H. Medlock Friedrich Carl Ludwig SCHOEDLER, 1854

The Light of Nature J.D. North, J.J. Roche, 2012-12-06 This volume of essays is meant as a tribute to Alistair Crombie by some of those who have studied with him The occasion of its publication is his seven tieth birthday 4 November 1985 Its contents are a reflection or so it is hoped of his own interests and they indicate at the same time his influence on subjects he has pursued for some forty years Born in Brisbane Australia Alistair Cameron Crombie took a first degree in zoology at the University of Melbourne in 1938 after which he moved to Jesus College Cambridge There he took a doctorate in the same subject with a dissertation on population dynamics foreshadowing a later interest in the history of Darwinism in 1942 By this time he had taken up a research position with the Ministry of Agriculture and Fisheries in the Cambridge Zoological Laboratory a position he left in 1946 when he moved to a lectureship in the history and philosophy of science at University College London H G Andrewartha and L C Birch in a survey of the history of insect ecology R F Smith et al History of Entomology 1973 recognise the importance of the works of Crombie with which they couple the earlier work of Gause as the principal stimulus for the great interest taken in interspecific competition in the mid 1940s

Nature's Body Londa L. Schiebinger, 2004 Eighteenth century natural historians created a peculiar and peculiarly durable vision of nature one that embodied the sexual and racial tensions of that era When plants were found to reproduce sexually eighteenth century botanists ascribed to them passionate relations polyandrous marriages and suicidal incest and accounts of steamy plant sex began to infiltrate the botanical literature of the day Naturalists also turned their attention to the great apes just becoming known to eighteenth century Europeans clothing the females in silk vestments and training them to sip tea with the modest demeanor of English matrons while imagining the males of the species fully capable of ravishing women

Nature's Enigma Virginia Parker Dawson, 1987 Two striking discoveries made 1740 a turning point in the history of 18th century biology Charles Bonnet established that aphids could reproduce without male fertilization Shortly afterwards

Abraham Trembley proved that a tiny aquatic animal the fresh water polyp or hydra could regenerate from cuttings like some plants The discovery of the polyp was important because of the disturbing metaphysical issues that it raised In their letters written during the decade of the 1740s to Reaumur the great French Academician both Trembley Bonnet referred to the polyp as an enigma Not only did it seem to present a new mode of animal reproduction previously unsuspected but it called into question the prevailing mechanistic view of animal biology brought into focus the problem of animal soul Drawing on some of the most illuminating letters from the private archives of the Trembley family this study focuses on the discovery of the polyp using the correspondence of Bonnet Trembley to understand their common Genevan background their possible differences in approach from that of Reaumur Beyond Nature Writing Karla Armbruster, Kathleen R. Wallace, 2001

Ecocriticism a field of study that has expanded dramatically over the past decade has nevertheless remained until recently closely focused on critical analyses of nature writing and literature of wilderness The authors push well beyond that established framework with this collection of essays by respected ecocritics and scholars from the literary and environmental arenas **Utopia's Garden** E. C. Spary, 2010-12-15 The royal Parisian botanical garden the Jardin du Roi was a jewel in the crown of the French Old Regime praised by both rulers and scientific practitioners Yet unlike many such institutions the Jardin not only survived the French Revolution but by 1800 had become the world's leading public establishment of natural history the Muséum d'Histoire Naturelle E C Spary traces the scientific administrative and political strategies that enabled the foundation of the Muséum arguing that agriculture and animal breeding rank alongside classification and collections in explaining why natural history was important for French rulers But the Muséum's success was also a consequence of its employees Revolutionary rhetoric by displaying the natural order they suggested the institution could assist in fashioning a self educating self policing Republican people Natural history was presented as an indispensable source of national prosperity and individual virtue Spary's fascinating account opens a new chapter in the history of France science and the Enlightenment **Care of the Species** John Hartigan Jr., 2017-11-15 Across the globe an expanding circle of care is encompassing a growing number of species through efforts targeting biodiversity profoundly revising the line between humans and nonhumans Care of the Species examines infrastructures of care labs and gardens in Spain and Mexico where plant scientists grapple with the complexities of evolution and domestication John Hartigan Jr uses ethnography to access the expertise of botanists and others engaged with cultivating biodiversity providing various entry points for understanding plants in the world around us He begins by tracing the historical emergence of race through practices of care on nonhumans showing how this history informs current thinking about conservation With geneticists working on maize Hartigan deploys Foucault's concept of care of the self to analyze how domesticated species are augmented by an afterlife of data In the botanical gardens of Spain Care of the Species explores seed banks herbariums and living collections depicting the range of ways people interact with botanical knowledge This culminates in Hartigan's effort to engage plants as ethnographic subjects

through a series of imaginative interview techniques Care of the Species contributes to debates about the concept of species through vivid ethnography developing a cultural perspective on evolutionary dynamics while using ethnography to theorize species In tackling the racial dimension of efforts to go beyond the human this book reveals a far greater stratum of sameness than commonly assumed **Consuming Habits** Jordan Goodman,Andrew Sherratt,Paul E. Lovejoy,2005-07-26 This pioneering collection of original essays explores the rich analytical category of psycho active substances from challenging historical and anthropological perspectives Psychoactive substances have been central to the formation of civilizations and the growth of the world economy Consuming Habits describes how and why tea and coffee replaced beer on the breakfast tables of 18th century Europe in Islamic emirates at the turn of the century kola nuts formed part of tax payments and were given as gifts by so called big men In 1902 opera singers had their doctors prescribe them cocaine to aid singing the original version of coca cola was described as a brain tonic This pioneering collection of original essays explores the rich analytical category of psychoactive substances from challenging historical and anthropological perspectives *The Graph of Sex and the German Text* ,2022-06-08
