Naval Policy And Strategy In The Mediterranean:

Naval Policy and Strategy in the Mediterranean John B. Hattendorf, 2013-11-05 Maritime strategy and naval power in the Mediterranean touches on migration the environment technology economic power international politics and law as well as calculations of naval strength and diplomatic manoeuvre These broad and fundamental themes are explored in this volume

Navies of South-East Asia James Goldrick, Jack McCaffrie, 2013 A comprehensive survey of the development and operations of the navies of South East Asia since the end of the Second World War from p 1 *Sea Power and the Asia-Pacific* Geoffrey Till, Patrick Bratton, 2012-02-07 This volume examines the rise and fall of sea powers in the Asia Pacific region

The Royal Navy and Maritime Power in the Twentieth Century Ian Speller, 2004-08-02 This book adopts an innovative new approach to examine the role of maritime power and the utility of navies It uses a number of case studies based upon key Royal Navy operations in the twentieth century to draw out enduring principles about maritime power and to examine the strengths and limitations of maritime forces as instruments of national policy Individual chapters focus on campaigns and operations from both World Wars and a series of post 1945 crises and conflicts from the Palestine Patrol in the 1940s to Royal Navy operations in support of British policy in the 1990s Each case study demonstrates critical features of maritime power including operations during the transition to war fleet operations in narrow seas logistics submarine operations the impact of air power on maritime operations blockade maritime power projection amphibious warfare jurisdictional disputes and the law of the sea and peace support operations The contributors to this book all have considerable experience lecturing on these issues at the United Kingdom Joint Services Command and Staff College where maritime campaign analysis is used to teach the principles of maritime power to officers of the Royal Navy The book combines an authoritative examination of critical Royal Navy operations during the twentieth century with a sophisticated analysis of the nature of maritime power As such it is of both historical interest and contemporary relevance and will prove equally valuable to academic historians military professionals and the general reader *The Royal Navy and Anti-submarine Warfare, 1917-49* Malcolm Llewellyn-Jones, 2006 An essential new account of how anti submarine warfare is conducted with a focus on both historic and present day operations This new book shows how until 1944 U boats operated as submersible torpedo craft which relied heavily on the surface for movement and charging their batteries This pattern was repeated in WWII until Allied anti submarine countermeasures had forced the Germans to modify their existing U boats with the schnorkel Countermeasures along also pushed the development of high speed U boats capable of continuously submerged operations This study shows how these improved submarines became benchmark of the post war Russian submarine challenge Royal Navy doctrine was developed by professional anti submarine officers and based on the well tried combination of defensive and offensive anti submarine measures that had stood the press of time since 1917 notwithstanding considerable technological change This consistent and holistic view of anti submarine warfare has not been understood by

most of the subsequent historians of these anti submarine campaigns and this book provides an essential and new insight into how Cold War and indeed modern anti submarine warfare is conducted *The Royal Navy, 1930-2000* Richard Harding, 2005 This book explores innovation within the Royal Navy from the financial constraints of the 1930s through to the refocusing of the Royal Navy after 1990 *The Hamburg Lectures on Maritime Affairs 2009 & 2010* Jürgen Basedow, Ulrich Magnus, Rüdiger Wolfrum, 2012-03-31 In 2007 the International Max Planck Research School for Maritime Affairs together with the International Tribunal for the Law of the Sea ITLOS both based in Hamburg decided to establish an annual lecture series the Hamburg Lectures on Maritime Affairs giving distinguished scholars and practitioners the opportunity to present and discuss recent developments in this field The present volume the second in the series collects eight of the lectures held in 2009 and 2010 by David Joseph Attard Lucius Caflisch Beate Czerwenka Lars Gorton Francesco Munari Kyriaki Nouria Peter Wetterstein and Wolfgang Wurmnest *Navies in Northern Waters* Rolf Hobson, TOM KRISTIANSEN, 2004-08-02 *Navies in Northern Waters* is a collection of articles covering the roles played by the secondary navies of northern European powers and the United States within the maritime balance of power The contributions covering the 18th and 19th centuries focus on their relations with each other as they sought to create a counterweight to the dominant naval power of Britain The inter war years are treated from the perspectives of international disarmament efforts within the framework of collective security and the subsequent naval rivalry in the Baltic area in the years leading up to the Second World War For the post 1945 period the contributions concentrate on superpower rivalry in northern waters during the Cold War the changing aspects of security policy since the collapse of the Soviet Union and the particular challenges facing small coastal states policing extensive waters of increasing economic importance *Maritime Diplomacy in the 21st Century* Christian Le Mièrre, 2014-04-24 This book aims to redefine maritime diplomacy for the modern era Maritime diplomacy encompasses a spectrum of activities from co operative measures such as port visits exercises and humanitarian assistance to persuasive deployment and coercion It is an activity no longer confined to just navies but in the modern era is pursued by coast guards civilian vessels and non state groups As states such as China and India develop they are increasingly using this most flexible form of soft and hard power *Maritime Diplomacy in the 21st Century* describes and analyses the concept of maritime diplomacy which has been largely neglected in academic literature The use of such diplomacy can be interesting not just for the parochial effects of any activity but because any event can reflect changes in the international order while acting as an excellent gauge for the existence and severity of international tension Further maritime diplomacy can act as a valve through which any tension can be released without resort to conflict Written in an accessible but authoritative style this book describes the continued use of coercion outside of war by navies while also situating it more clearly within the various roles and effects that maritime forces have in peacetime This book will be of much interest to students of seapower naval history strategic studies diplomacy and international relations ***The Merchant Marine in International Affairs, 1850-1950***

Greg Kennedy, 2014-07-10 Merchant navies represent economic and industrial strength This study revises the definition of maritime power through a more comprehensive understanding and appreciation for the roles played by the merchant marine of a nation
