and Pollution in China Benjamin van Rooij,2006 Annotation Many of China s rivers and lakes are strongly polluted the air in cities is amongst the worst in the world while some have warned that if the country is not careful it may soon have insufficient arable land to feed its population This book looks at why the protection of natural resources through stricter legislation and more stringent law enforcement has been so difficult It does so through a combination of a local case with comparative and theoretical insights about lawmaking compliance and enforcement It offers a unique view on how law functions in the world s largest legal system and how such law interacts with the social economic and political circumstances at hand This book offers an incomparable body of empirical and theoretical knowledge for those interested in how law functions in China as well as those interested in the workings of regulatory lawmaking compliance and enforcement in a comparative perspective This title can be previewed in Google Books <http://books.google.com/books> vid ISBN9789087280130
