Prospect For Metaphysics Essays Of Metap:

Catalogue of Additions (Non-Fiction and Fiction) to the Adult Libraries Bristol (England). Public Libraries,1967
The Cumulative Book Index ,1985 A world list of books in the English language Whitaker's Cumulative Book List
,1985 The Metaphysics of Technology David Skrbina,2014-07-25 What is technology Why does it have such power in our
lives Why does it seemingly progress of its own accord and without regard to social or environmental well being The quest
for the essence of technology is an old one with roots in the pre Socratic philosophy of ancient Greece It was then that
certain thinkers first joined the ideas of techn and logos into a single worldview The Greeks saw it as a kind of world force
present in both the works of men and in nature itself It was the very creative power of the cosmos In the 20th century
German thinkers like Dessauer Juenger and Heidegger sought the metaphysical basis of technology with varying success
French theologian Jacques Ellul argued persuasively that technology was an autonomous force of nature that determined all
aspects of human existence but he neglected the metaphysical underpinnings Recent writers in the philosophy of technology
have generally eschewed metaphysics altogether preferring to concentrate on constructivist models or pragmatic analyses In
the present work Skrbina returns to a classic metaphysical approach seeking not so much an essence of technology but
rather a deep and penetrating analysis of the entire technological phenomenon Drawing on the Greeks he argues for a
teleological metaphysics in which increasing order in the universe is itself defined as a technological process On this reading
all of reality constitutes a technical sphere a panteknikon of universal scope This work the first ever book length treatment
of the topic breaks new ground by providing an in depth and critical study of the metaphysics of technology as well as
drawing out the practical consequences Technology poses significant risks to humanity and the planet risks that can be
mitigated through a detailed philosophical analysis Current Catalog National Library of Medicine (U.S.),1979 First multi
