book offers a critical analysis of the European colonial heritage in the Arab countries and highlights the way this legacy is
still with us today informing the current state of relations between Europe and the formerly colonized states The work
analyses the fraught relationship between the Western powers and the Arab countries that have been subject to their colonial
rule It does so by looking at this relationship from two vantage points On the one hand is that of humanitarian intervention a
paradigm under which colonial rule coexisted alongside humanitarian policies pursued on the dual assumption that the
colonized were barbarous peoples who wanted to be civilized and that the West could lay a claim of superiority over an
inferior humanity On the other hand is the Arab view from which the humanitarian paradigm does not hold up and which
accordingly offers its own insights into the processes through which the Arab countries have sought to wrest themselves

from colonial rule In unpacking this analysis the book traces a history of international and colonial law to this end also using the tools offered by the history of political thought The book will be of interest to students academics and researchers working in legal history international law international relations the history of political thought and colonial studies

On Race and Racism in America Roy Martinez,2010-01-01 Given the racial complexity of the United States not to mention the racism of its foundations and its persistence why is it that the most influential white philosophers have not addressed the issue of race its social construction and myth and the problems it raises on a daily basis

To answer this question Roy Martinez the editor of this volume solicited contributions from eight of the most significant American philosophers working in the Continental and American pragmatist philosophical traditions But there is no one answer each contributor has a distinct perspective on the problem and provides an answer reflecting that perspective Some approach the question in a personal manner by reflecting on how race has affected their own lives Others resort to meta analyses of features of philosophy as a discipline that account for its relative blindness to issues of race Together they shed light on an anomaly that distinguishes philosophy from the other humanities as well as the social sciences a relative lack of attention to race compared with class and gender and thus help us better understand how the mental frameworks within which scholars operate can lead to differences in the subjects they take an interest in analyzing Aside from the editor the contributors are John D Caputo David Couzens Hoy John Ladd Joseph Margolis Ladelle McWhorter Shannon Sullivan Georgia Warnke and Cynthia Willett
