Protecting Critical Infrastructures Against Cyber Attack:

Protecting Critical Infrastructures Against Cyber-Attack Stephen Lukasik, 2020-10-28 The threat that is posed by cyber warriors is illustrated by recent incidents such as the Year 2000 Millennium Bug Strategies to reduce the risk that cyber attack poses at both individual and national level are described and compared with the actions being taken by a number of Western governments **Adelphi Papers**, 2003 **Cybersecurity** Thomas A. Johnson, 2015-04-16 The World Economic Forum regards the threat of cyber attack as one of the top five global risks confronting nations of the world today Cyber attacks are increasingly targeting the core functions of the economies in nations throughout the world The threat to attack critical infrastructures disrupt critical services and induce a wide range of damage *Technology assessment cybersecurity for critical infrastructure protection.*, 2004 *Cyber-Physical Security* Robert M. Clark, Simon Hakim, 2016-08-10 This book focuses on the vulnerabilities of state and local services to cyber threats and suggests possible protective action that might be taken against such threats Cyber threats to U S critical infrastructure are of growing concern to policymakers managers and consumers Information and communications technology ICT is ubiquitous and many ICT devices and other components are interdependent therefore disruption of one component may have a negative cascading effect on others Cyber attacks might include denial of service theft or manipulation of data Damage to critical infrastructure through a cyber based attack could have a significant impact on the national security the economy and the livelihood and safety of many individual citizens Traditionally cyber security has generally been viewed as being focused on higher level threats such as those against the internet or the Federal government Little attention has been paid to cyber security at the state and local level However these governmental units play a critical role in providing services to local residents and consequently are highly vulnerable to cyber threats The failure of these services such as waste water collection and water supply transportation public safety utility services and communication services would pose a great threat to the public Featuring contributions from leading experts in the field this volume is intended for state and local government officials and managers state and Federal officials academics and public policy specialists *Critical Foundations* United States. President's Commission on Critical Infrastructure Protection, 1997 In summary all of us need to recognize that the cyber revolution brings us into a new age as surely as the industrial revolution did two centuries ago Now as then our continued security requires a reordering of national priorities and new understanding about our respective roles in support of the national goals The relationships that have stood us in such good stead through the end of the second millennium must give way to new ones better suited to the third Page xi
