Protecting Intellectual Property Rights Robert P. Benko, 1987 Policymakers responsible for American trade policy have become increasingly concerned with intellectual property issues This volume is based on the premise that there is confusion over the details of intellectual property law and enforcement in international markets Discussing the emerging trade related intellectual property issues Benko attempts to clear up some of this confusion This monograph provides essential definitions a review of the existing legal regime an introduction to the history and economics of intellectual property rights and a summary of the major policy issues It also offers some suggestions for additional research ISBN 0 8447 3617 1 ISBN 0 8447 3622 8 pbk 5 27

Issues Of Intellectual Property Rights Ramesh Chandra, 2004 Protection of intellectual property has always been a different task as it is not a thing that can be kept in a closet for protection There have been the legal safeguards like patents trademarks and copyrights but with technological advances it has become more and more difficult to protect IPRs In this era of information technology internet has become a huge information outlet and also a favourite tool for IPR invaders More means are being discovered by hackers to download the multimedia works and use them against the interest of IPR holders This work is about the knowledge of intellectual property ownership and copyrights patents and trademarks and how to protect intellectual property in today's high tech world It is designed to make people aware of IP laws and what is new on the protection of ideas that are meant to be spread through various forms of media The holders of Intellectual Property Rights the new entrants and technology conscious people interested in IPRs will find this work quite informative

Digital Copyright Jessica Litman, 2001 In 1998 copyright lobbyists succeeded in persuading Congress to enact laws greatly expanding copyright owners control over individuals private uses of their works The efforts to enforce these new rights have resulted in highly publicised legal battles between established media and new upstarts In this enlightening and well argued book law professor Jessica Litman questions whether copyright laws crafted by lawyers and their lobbyists really make sense for the vast majority of us Should every interaction between ordinary consumers and copyright protected works be restricted by law Is it practical to enforce such laws or expect consumers to obey them What are the effects of such laws on the exchange of information in a free society Litman's critique exposes the 1998 copyright law as an incoherent patchwork She argues for reforms that reflect common sense and the way people actually behave in their daily digital interactions This paperback edition includes an afterword that comments on recent developments such as the end of the Napster story the rise of peer to peer file sharing the escalation of a full fledged copyright war the filing of lawsuits against thousands of individuals and the June 2005 Supreme Court decision in the Grokster case

Protecting Intellectual Property in the Arabian Peninsula David

Price, Alhanoof AlDebasi, 2017-09-13 This work examines the endeavours of the Arabian Peninsula States namely the Gulf Cooperation Council member States of Bahrain Kuwait Oman Qatar Saudi Arabia and the UAE as well as Jordan and Yemen as prospective GCC members in establishing national intellectual property protection regimes which both meet their international treaty obligations and are also congruent with their domestic policy objectives It uses the WTO's TRIPS Agreement of 1995 as the universal benchmark against which the region's laws are assessed The challenges faced by the States in enforcing their intellectual property laws receive particular attention Protecting Intellectual Property in the Arabian Peninsula considers the changing nature of the States intellectual property laws since 1995 It argues that the decade immediately following the TRIPS Agreement was marked by a period of foreign forces shaping or influencing the character of the States intellectual property legislative regimes primarily through multilateral or bilateral trade based agreements The second and current decade however see a significant shift away from foreign influences and a move towards domestic and regional imperatives and initiatives taking over The work also examines regional initiatives for the protection of traditional knowledge and cultural heritage as areas of intellectual property which fall outside the parameters of the TRIPS Agreement but which are of significant concern to the States and other developing countries and to which they are giving increasing attention in terms of providing proper protection

Intellectual Property Law Terence P. Ross, 2000 This book addresses two crucial concerns of intellectual property owners how to recover monetary compensation when an infringement has occurred and how to prevent further infringement

Intellectual Property in the Global Marketplace, Intellectual Property Rights in Central and Eastern Europe Elmar Altvater, Kazimiera Prunskienė, 1998 The establishment of Intellectual Property Rights is of utmost importance for the functioning of the market mechanism in a modern economy based more and more on trade in services and software products Most Central and Eastern European Countries already dispose on systems of Intellectual Property Rights protection The law enforcement mechanism in a series of countries however must still be strengthened In one section of the book the authors give an overview on the institutionalisation of Intellectual Property Rights in Central and Eastern Europe and in some successor states of the former Soviet Union with special regard to Russia Moreover Intellectual Property Rights systems in the United States and Western Europe are compared and the rules of WTO were taken under consideration in order to find out their potential for fostering or hampering the central and eastern European process of transition Finally a deliberation on the historical grounds and theoretical foundations of individual and common property rights with regard to economic and technological innovation is included into the collection The volume gives a comprehensive overview on the state of Intellectual Property Rights institutionalisation in the course of the process of transition in Central and Eastern Europe

Protecting Your Intellectual Property Rights Peggy E Chaudhry, Alan Zimmerman, 2012-12-09 Counterfeit products represent a growing problem for a wide range of industries

There are many estimates of the size of this problem most of which coalesce around 500 billion annually on a global basis Overall a wide range of industries agree that there is a severe problem with the global protection of intellectual property rights IPR yet there have been virtually no attempts to describe all aspects of the problem This book aims at giving the most complete description of various characteristics of the intellectual property rights IPR environment in a global context The authors believe a holistic understanding of the problem must include consumer complicity to purchase counterfeit actions of the counterfeiters pirates as well as actions or inaction by home and host governments and the role of international organizations and industry alliances Only after establishing how all the actors in the IPR environment relate to one another can we describe global protection of the intellectual property rights environment and the managerial response of IPR owners and or industry associations to combat this ongoing problem The book concludes with pragmatic recommendations for protecting intellectual property given the recent trends discussed in the previous chapters making it of interest to practitioners and policy makers alike
