Protecting the Elderly Charles Lockhart, 2001-08-01 Building on the pioneering work of anthropologist Mary Douglas and political scientist Aaron Wildavsky this book develops and applies grid group theory to show how political culture can be used to explain decisions about social policy and how as an interpretive approach this theory complements the now more dominant rational choice and institutionalist models In Part One Lockhart elaborates on the basic ideas involved in grid group theory using examples to help illuminate how the theory can address areas of explanation left out of rational choice and institutionalist models such as preference formation and institutional design According to grid group theory different societies have varying proportions of their members who adhere to one or another of three ubiquitous socially interactive cultures hierarchy individualism and egalitarianism The adherents of these disparate cultures adopt culturally constrained rationalities based on rival sets of values and strive to construct distinctive institutional designs In Part Two this theory is used to help make better sense of social policy decision making A society whose political elite is predominantly hierarchical for instance will develop social programs sharply distinct from those of societies whose leaders are adherents of individualism or egalitarianism The empirical focus of this part of the book is on the decisions about policy affecting the elderly in the United States the former Soviet Union Germany and Japan during the economically difficult 1980s Important aspects of these decisions Lockhart shows reflect the relative influence of rival cultural purposes among relevant societal elites

Cultural Analysis Aaron Wildavsky, 2018-02-06 As a result of a lifetime of incomparably wide ranging investigations Aaron Wildavsky concluded that politics in the United States and elsewhere was a patterned activity exhibiting recurring regularities Political values beliefs and institutions were neither endlessly varied nor haphazardly organized They tended to exhibit a limited range of variation and were organized in discoverable predictable ways In *Cultural Analysis* the fourth collection of his essays posthumously published by Transaction Wildavsky argues that American politics public law and public administration are the contested terrain of rival inescapable political cultures Analysts of American politics distinguish liberals from conservatives and Democrats from Republicans but do not explain how these categories of political allegiance develop maintain themselves or change Wildavsky offers a cultural functional explanation for ideological and partisan coherence and realignment Wildavsky also felt that these dualisms did not adequately capture the ideological and partisan variation he observed on the political landscape Like others he detected another recurring strain of political allegiance that of classical liberalism or libertarianism People of this political stripe valued freedom more than equality the primary political value of contemporary liberals and also more than order the primary political value of conservatives The value of Wildavsky's reconceptualization of the ideological and social foundations of political conflict compromise and coalition is assessed here by Wildavsky's former colleagues and students at the University of California Berkeley Dennis Coyle Richard Ellis Robert Kagan Austin Ranney and Brendon Swedlow
