Worlds of Protest & Worlds of Dissent David Aitken, 2016 This thesis explores the similarities and dissimilarities between West German protest and Czechoslovak dissent during the 1960s and 1970s It argues that Jonathan Bolton s conception of Czechoslovak dissent as one world or many different worlds of experiences can be used to fruitfully examine roughly contemporaneous protest movements on the other side of the Iron Curtain during the postwar period Appealing to Bolton s description of the worlds of dissent in Czechoslovakia this thesis introduces the idea of the worlds of protest in West Germany What is sought is a better understanding of the nature of protest and the nature of dissent as related but distinct forms of political and cultural phenomena It claims that both West German protest and Czechoslovak dissent were intertwined with a concurrent crisis of credibility facing the political and social orders of each country The oppositional movements which emerged in West Germany and Czechoslovakia during the 1960s and 1970s developed critiques of their respective regimes through reflections on the legacies of fascism and Stalinism in each country This paper further argues that the strength of these critiques was largely derived from the extent to which the movements achieved an accurate understanding of the real nature of the regimes they criticised While Czechoslovaks achieved a more cogent understanding of Gust v Hus k s Communist regime during the 1970s West German s were unable to develop as rigorous an understanding of the Federal Republic due to their

continued tendency to approach the Bonn regime through reflections on Germany's Nazi past. In general, this thesis contends that investigating West German protest in light of Czechoslovak dissent opens up new avenues for scholarly inquiry which will allow us to move past the global narratives of social unrest that dominate much of the historical literature written on the 1960s and 1968 in particular. *West Germany and the Global Sixties* Timothy Scott Brown, 2013. The anti-authoritarian revolt of the 1960s and 1970s was a watershed in the history of the Federal Republic of Germany. The rebellion of the so-called 68ers against cultural conformity and the ideological imperatives of the Cold War against the American war in Vietnam in favor of a more open accounting for the crimes of the Nazi era helped to inspire a dialogue on democratization with profound effects on German society. Timothy Brown examines the unique synthesis of globalizing influences on West Germany to reveal how the presence of Third World students imported pop culture from America and England and the influence of new political doctrines worldwide all helped to precipitate the revolt. The book explains how the events in West Germany grew out of a new interplay of radical politics and popular culture even as they drew on principles of direct democracy, self-organization and self-determination all still highly relevant in the present day. *1968 and the RAF. the Development of Violence and Terrorism from a Social Movement* Fabian Lukas, 2015-05-13. Studienarbeit aus dem Jahr 2014 im Fachbereich Geschichte Europa und Länder: Neueste Geschichte Europäische Einigung Ruhr Universität Bochum Sprache Deutsch. Abstract: Social Movements are one of the main forms of collectives that formulate a goal they want to achieve. This occurs under the use of various strategies to show their demands like collective protests and demonstrations. Social Movements are an important vehicle for the public to gain attention and formulate needs. In the society, those Movements are standing next to other more institutionalized ways of protests so they are an actor among others. Today, Social Movements represent an important part of the social landscape. They are different movements dealing with a lot of topics like abortion, human and civil rights, environmental protection, women, etc. Also, the Movements can have a global or a local nature. According to the development of Social Movements, the researchers David A. Snow, Sarah A. Soule, and Hanspeter Kriesi suggested that the society of the 21st century can be characterized as a movement society. One important step for the development and the proliferation of Social Movements are the 1960s. Even if there is no consensus among the scholars about the exact impact, the 1960s form a remarkable step in the history of Social Movements. In Germany, this step was represented by the Student Movement of 1968 that even if most of the political goals the movement wanted to achieve failed, played an important role. Social movements are fuzzy phenomena and moving targets so it is difficult to give a definition about them. In structural terms, a social movement is like a network of individuals, groups, and/or organizations. A network has no top and no clear center that could steer and control the whole of its activities. Also, the use of collective public protest is a key strategy of any social movement to pursue their goal. These strategies can also include the use of violence. This homework is going to... *New Social Movements and Public Policy in West Germany, 1969-1989* Roger S. Karapin, 1993.
