Protocol Design For Local And Metropolitan Area Networks:

   Protocol Design for Local and Metropolitan Area Networks Paweł Gburzyński,1996 Appropriate for advanced undergraduate or graduate courses in local and metropolitan area networks This is the only book on the market that gives a comprehensive algorithmic approach to medium access control protocols for local and metropolitan area networks LANs and MANs It introduces a programming language SMURPH for demonstrating these protocols in high level terms while retaining their implementation level details Protocols expressed in SMURPH are executable and easy to experiment with   **Optical Packet Access Protocols for WDM Networks** Kemal Bengi,2012-12-06 The fast growing traffic demand in telecommunication networks by use of the Internet and an increasing number of broadband services for multimedia com munications requires new high performance networking technologies As such optical WDM networks are playing a pivotal role Wavelength Division Mul tiplexing WDM with many hundreds of wavelength channels per fiber is ex tensively being exploited in wide area networks With respect to the ongoing trend towards a completely packet switched mode of operation for all services WDM networks must be prepared accordingly This work concentrates on optical packet switched networking in local and metro area networks for realizing high performance applications like virtual re ality medical imaging and supercomputing It is well known that in those networks using a star bus or ring shared medium an access protocol is nec essary to guarantee controlled and fair access for all attached nodes Similar access protocols are to be developed and analyzed for WDM local and metro area networks Already many media access protocols for these networks have been described in the literature However some aspects of Quality of Service QoS for different service classes are still an open issue and subject to inten sive research activities In the introduction the author Dr Kemal Bengi gives a short classification of media access protocols and network architectures for WDM local and metro area networks The need for service classes is also em phasized   *Modeling Communication Networks and Protocols* Paweł Gburzyński,2019-04-03 This book provides an introduction to the software system SMURPH comprising a programming language its compiler and an execution environment for specifying communication networks and protocols and executing those specifications in virtual worlds mimicking the behavior of real life implementations It particularly focuses on SMURPH s wireless modeling capabilities Written in a manual like fashion it includes a comprehensive description of SMURPH functionality as well as illustrations and case studies to aid understanding   **Network Performance Modeling and Simulation** Jean Walrand,Kallol Bagchi,George Zobrist,2019-08-16 This book makes the argument that performance modeling and simulation have become central issues in computer science and engineering in part due to applications to the structures comprising the Internet Dealing primarily with theory tools and techniques as related to communications systems the volume provides tutorials and surveys and relates new important research results Each chapter presents background information describes and analyzes important work done in the field and provides direction to the reader on future work and further readings The topics covered

include traffic models for A TM networks simulation environments analytical methods interprocessor communications and an evaluation of process architectures **Artificial Intelligence Applications and Innovations II** Daoliang Li,Baoji Wang,2006-03-11 Artificial Intelligence is one of the oldest and most exciting subfields of computing covnering such areas as intelligent robotics intelligent planning and scheduling model based reasoning fault diagnosis natural language processing maching translation knowledge representation and reasoning knowledge based systems knowledge engineering intelligent agents machine learning neural nets genetic algorithms and knowledge management The papers in this volume comprise the refereed proceedings of the Second International Conference on Artificial Intelligence Applications and Innovations held in Beijing China in 2005 A very promising sign of the growing importance of Artificial Intelligence techniques in practical applications is the large number of submissions received for the conference more than 150 All papers were reviewed by at least two members of the Program Committee and the test 93 were selected for the conference and are included in this volume The international nature of IFIP is amply reflected in the large number of countries represented here
