Religion and Psychiatry Peter Verhagen, Herman M. Van Praag, Juan José Lopez-Ibor, John Cox, Driss Moussaoui, 2012-02-27 Religion and spirituality is very much alive and shapes the cultural values and aspirations of psychiatrist and patient alike as does the choice of not identifying with a particular faith Patients bring their beliefs and convictions into the doctor patient relationship The challenge for mental health professionals whatever their own world view is to develop and refine their vocabularies such that they truly understand what is communicated to them by their patients Religion and Psychiatry provides psychiatrists with a framework for this understanding and highlights the importance of religion and spirituality in mental well being This book aims to inform and explain as well as to be thought

provoking and even controversial. Patiently and thoroughly the authors consider why and how when and where religion and spirituality are at stake in the life of psychiatric patients. The interface between psychiatry and religion is explored at different levels varying from daily clinical practice to conceptual fieldwork. The book covers phenomenology, epidemiology, research data, explanatory models and theories. It also reviews the development of DSM V and its awareness of the importance of religion and spirituality in mental health. What can religious traditions learn from each other to assist the patient? Religion and Psychiatry discusses this as well as the neurological basis of religious experiences. It describes training programmes that successfully incorporate aspects of religion and demonstrates how different religious and spiritual traditions can be brought together to improve psychiatric training and daily practice. Describes the relationship of the main world religions with psychiatry. Considers training policy and service delivery. Provides powerful support for more effective partnerships between psychiatry and religion in day to day clinical care. This is the first time that so many psychiatrists, psychologists and theologians from all parts of the world and from so many different religious and spiritual backgrounds have worked together to produce a book like this one. In that sense it truly is a World Psychiatric Association publication. Religion and Psychiatry is recommended reading for residents in psychiatry, postgraduates in theology, psychology and psychology of religion, researchers in psychiatric epidemiology and trans cultural psychiatry as well as professionals in theology, psychiatry and psychology of religion.

Lonergan, Social Transformation, and Sustainable Human Development Joseph Ogbonnaya, 2013-01-29. Secular contemporary development discourse deals with the problems of societal development and transformation by prioritizing the human good in terms of vital and social values with the aim of providing the basic necessities of life through social institutions that work. While such an approach is profitable by promoting economic growth, it does not take note of other dynamics of social progress and development. Also, it fails to notice the consequences of development strategies on human flourishing, well being and happiness. Ogbonnaya argues for an integral approach to development by engaging in a fruitful dialogue between Bernard Lonergan's philosophical anthropology with contemporary development discourse as represented in select theories of development and in select principles of Catholic social teaching. It makes a case for social progress and transformation as emanating from human understanding. Also, it highlights the parts of Lonergan's theory that contribute to an understanding specifically of his treatment of bias and of the shorter and longer cycles of societal decline. In view of the reality of moral impotence and limitations, it considers the reversal of societal decline as possible through the supernatural solution of God's grace.
