The American Psychiatric Association Practice Guidelines for the Psychiatric Evaluation of Adults, Third Edition American Psychiatric Association, 2015-07-29 Since the publication of the Institute of Medicine IOM report Clinical Practice Guidelines We Can Trust in 2011 there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy developed in a transparent fashion and based on a systematic review of the available research evidence To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality AHRQ American Psychiatric Association APA has adopted a new process for practice guideline development Under this new process APA's practice guidelines also seek to provide better clinical utility and usability Rather than a broad overview of treatment for a disorder new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies The quality of the overall body of evidence is also rated and is summarized in the practice guideline With the new process recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context Clear concise and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice with the goal of improving quality of care The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions Each module has a consistent organization which will assist users in finding clinically useful and relevant information quickly and easily This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process These guidelines address the following nine topics in the context of an initial psychiatric evaluation review of psychiatric symptoms trauma

history and treatment history substance use assessment assessment of suicide risk assessment for risk of aggressive behaviors assessment of cultural factors assessment of medical health quantitative assessment involvement of the patient in treatment decision making and documentation of the psychiatric evaluation Each guideline recommends or suggests topics to include during an initial psychiatric evaluation Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions In addition to reviewing the available evidence on psychiatry evaluation each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care

The Psychiatric Mental Status Examination Paula T. Trzepacz, Robert W. Baker, 1993-08-19 Developed from years of teaching psychiatry to medical students and residents this comprehensive text devoted solely to describing the mental status examination MSE fills a void in the teaching literature and will be valuable to both students first learning about the MSE and seasoned clinicians seeking an informative reference The introductory chapter offers basic advice on interviewing patients and eliciting information Six major sections of the MSE follow and are thoroughly described with a chapter devoted to each Appearance Attitude Activity Mood and Affect Speech and Language Thought Content Thought Process and Perception Cognition and Insight and Judgment Each chapter lists a detailed definition of reference for students describing their findings and are an insightful review even for experienced practitioners The clinical relevance of mental status abnormalities is illustrated through frequent examples of disorders that can cause the particular signs and symptoms defined in each chapter A final chapter describing fictional case histories with hypothetical examples of written mental status reports will be particularly useful for those learning to write such reports This text is an important addition to the libraries of students and practitioners who work with psychiatric patients and should help to simplify and organize a challenging task

Viruses, Immunity, and Mental Disorders Edouard Kurstak, Z.J. Lipowski, P.V. Morozov, 2014-01-13 In spite of progress in biomedical research we know little about the causes prevention and treatment of the numerous mental and neurological disorders that afflict up to 15% of all individuals In the last decade great advances have been made in the physiopathology of mental and neurological disorders leading to at least a partial control of Parkinson s disease epilepsy certain psychoses and anxiety syndromes Despite the fact that an underlying specific neurotransmitter deficiency has been demonstrated in Alzheimer s and Parkinson s diseases the immune dysfunction and viral hypotheses continue to be attractive for investigators dealing with these degenerative diseases of the aging brain which afflict 10% of senior citizens A retrospective epidemiologic study suggests that the encephalitis lethargica and parkinsonism were almost certainly caused by the 1918 influenza virus pandemics It must be stressed that the etiopathogenesis of many mental disorders is not known and this ignorance has led to several untenable neurophysiological and biochemical hypotheses Epidemiologic investigations show a high prevalence of functional psychoses and organic mental disorders Although many of them are conceptualized as biopsychosocial disorders recent data indicate that the biological component appears more and more as a major etiologic factor Among the various

biological hypotheses the viral and immunologic concept has become a significant one In view of recent discoveries in virology and immunity it becomes clear that viral and immunologic hypotheses should be investigated more systematically concerning the mechanisms of numerous mental and neurological disorders
