*Psychiatric-mental Health Nursing* American Psychiatric Nurses Association Staff, Ana, International Society of Psychiatric-Mental Health Nurses Staff, 2014 Psychiatric mental health PMH nursing is the nursing practice specialty committed to promoting mental health through the assessment diagnosis and treatment of behavioral problems mental disorders and comorbid conditions across the lifespan PMH nursing intervention employs a purposeful use of self and a wide range of nursing psychosocial and neurobiological evidence to produce effective outcomes

The American Psychiatric Nurses Association and the International Society of Psychiatric Mental Health Nurses convened a task force of nurse experts from across their practice to review and revise Psychiatric Mental Health Nursing Scope and Standards of Practice published in 2007. With input from across the nursing profession that was facilitated by ANA, the task force developed this all new edition. It is the definitive and up to date delineation of psychiatric mental health nursing articulating the competent level of nursing practice and professional performance of all PMH registered nurses whatever their practice level or setting. The publication's scope of practice addresses what is expected of all psychiatric mental health nurses specifying the who what where when why and how of their practice. The detailed discussion of that scope of practice provides the context needed to understand and use the standards presenting the underlying assumptions characteristics environments and settings education and training requirements key issues and trends and ethical and conceptual bases of the specialty. The standards themselves are authoritative statements that describe the responsibilities by which psychiatric mental health nurses are held accountable in their practice. Each standard is measurable by a set of specific competencies that serve as evidence of minimal compliance with that standard. While this foundational volume is primarily for those directly involved with psychiatric mental health nursing practice education and research other nursing and allied healthcare providers researchers and scholars will find value in this content. In addition it is a resource for employers insurers lawyers policy makers regulators and stakeholders. Since the late 1990s ANA has partnered with other nursing organizations to establish a formal process for recognition of specialty areas of nursing practice. This includes the criteria for approving the specialty itself and the scope statement and an acknowledgment by ANA of the standards of practice for that specialty. Because of the significant changes in the evolving nursing and healthcare environments ANA's approval of specialty nursing scope statements and its acknowledgment of specialty standards of practice remain valid for five years starting from the publication date of the documents. The standards in this publication are based on language from ANA's Nursing Scope and Standards of Practice Second Edition a helpful supplement to this specialty text which in turn is of optimal use with two complementary ANA texts Nursing's Social Policy Statement The Essence of the Profession and Guide to the Code of Ethics for Nurses Interpretation and Application. These three books are also available as a set ANA's Foundation of Nursing Package to guide nursing practice thinking and decision making. The set is proving useful as a professional reference classroom textbook in service training guide and credentialing exam resource.
