Ethical Considerations at the Intersection of Psychiatry and Religion John Peteet, Mary Lynn Dell, Wai Lun Alan Fung, 2018-01-05 Psychiatry and religion spirituality R S share an interest in human flourishing a concern with beliefs and values and an appreciation for community Yet historical tensions between science and religion continue to impede dialogue leaving clinicians uncertain about how to approach ethical questions arising between them When are religious practices such as scrupulosity disordered What distinguishes healthy from unhealthy religion How should a therapist approach a patient's existential moral or spiritual distress What should clinicians do with patients R S convictions about faith healing same sex relationships or obligations to others Discussions of psychiatric ethics have traditionally emphasized widely accepted principles generally admired virtues and cultural competence Relatively little attention has been devoted to the

ways that R S inform the values of patients and their clinicians shape preferred virtues and interact with culture Ethical Considerations at the Intersection of Psychiatry and Religion aims to give mental health professionals a conceptual framework for understanding the role of R S in ethical decision making and serve as practical guidance for approaching challenging cases Part I addresses general considerations including the basis of therapeutic values in a pluralistic context the nature of theological and psychiatric ethics spiritual issues arising in diagnosis and treatment unhealthy and harmful uses of religion and practical implications of personal spirituality Part II examines how these considerations apply in specific contexts inpatient and outpatient consultation liaison child and adolescent geriatric disability forensic community international addiction and disaster and emergency psychiatry as well as in the work of religious professionals ethics committees psychiatric education and research Thick descriptions of case examples analyzed using the framework of Jonson and Winslow show the clinical relevance of understanding the contributions of religion and spirituality to patient preferences quality of life decision making and effective treatment
