Psychiatrists-- the Men Behind Hitler Thomas Röder, Volker Kubillus, Anthony Burwell, 1995 Index **Nazi Eugenics** Melvyn Conroy, 2017-09-19

Conceived as the answer to all of mankind's seemingly insoluble health and social problems and promoted as a substitute for orthodox religious beliefs the pseudoscience of eugenics recruited disciples in many countries during the latter years of the nineteenth and early years of the twentieth centuries Nowhere was this doctrine more enthusiastically endorsed than in Germany where the application of eugenic theory received its most fervent support A program born of what were often contradictory opinions began under Nazi rule with the compulsory sterilization of thousands of Germany's citizens before morphing into the mass murder of the most vulnerable of the state's own population under the guise of so called euthanasia before ultimately escalating into a continent wide policy of extermination of those who did not fit the Nazi eugenic template The progress of this inexorable descent into barbarity was marked by successive stages of development From the practical application of euthanasia through the organization dedicated to it later on called Aktion T4 and the killing centers that this institution spawned to the centrality of Aktion T4 to Aktion Reinhardt and the Holocaust important elements of the historical record can be seen to emerge How did it happen What impact has it had on contemporary society And what of the character and fate of the individuals involved in the gestation and implementation of this murderously inhumane quasi religion These deceptively simple questions require complex and often disturbing answers as shown by Melvyn Conroy in this important work *The Quest for the Inner Human* Steven H. Propp, 2013-12-03

Psychology means the study of the soul it is the social science concerned with investigating who we are why we have certain feelings and why we do the things we do Are we no more than a vast assembly of nerve cells and their associated molecules Is biology our genetic inheritance destiny or does social upbringing play a crucial role What are the roles played by Nature and by Nurture Are we purely physical beings or is there an aspect that can be called spiritual This thought provoking novel takes you on a journey of intellectual and emotional exploration considering along the way questions that we've all asked ourselves such as Is it true that we only use 10% of our brains Does playing classical music for infants increase their intelligence Do crime rates go up during a full moon Can hypnosis or post hypnotic suggestions make us do something we wouldn't normally do Does subliminal advertising influence us to buy products Are our memories stored indelibly almost like a tape recorder What causes memory lapses as we age Can repressed traumatic memories be recovered through hypnosis Do some people have multiple personalities How can I tell if someone has a neurosis or a psychosis Do men have an inner feminine side and women an inner masculine Are there innate psychological differences between males and females The four main characters in this book will guide you through a diverse and sometimes bewildering world of differing approaches to answering such questions such as Freudian Jungian and Adlerian Humanistic Existential and Transpersonal as well as Cognitive Emotive and Behaviorist Along the way you will learn about the developmental stages proposed by psychologists

such as Erikson Kohlberg Piaget and Fowler and even explore some of the questions currently being asked by both neuroscientists and philosophers of the mind Start reading to begin your study of our innermost selves *The First into the Dark* Michael Robertson, Astrid Ley, Edwina Light, 2019-10-22 Under the Nazi regime a secret program of euthanasia was undertaken against the sick and disabled Known as the Krankenmorde the murder of the sick 300 000 people were killed A further 400 000 were sterilised against their will Many complicit doctors nurses soldiers and bureaucrats would then perpetrate the Holocaust From eyewitness accounts records and case files *The First into the Dark* narrates a history of the victims perpetrators opponents to and witnesses of the Krankenmorde and reveals deeper implications for contemporary society moral values and ethical challenges in end of life decisions reproduction and contemporary genetics disability and human rights and in remembrance and atonement for the past Representation, Subversion, and Eugenics in Günter Grass's *The Tin Drum* Peter O. Arnds, 2004 In structure and content Grass's novel connects the persecution of degenerate art to the persecution and extermination of these asocials for whom the persecuted dwarf protagonist Oskar Matzerath becomes a central metaphor and voice This comparative study reveals that through intertextuality with the European fairy tale tradition the picaresque novels of Rabelais and Grimmelshausen and through an array of carnivalesque figures Grass creates an irrational counterculture opposed to the rationalism of Nazi science and its obsession with racial hygiene while simultaneously exposing the continuity of this destructive rationalism in postwar Germany and the absurdity of a Stunde Null that putative tabula rasa of 1945 **BOOK JACKET** NLM Newslines, 1997 Bioethics and the Holocaust Stacy Gallin, Ira Bedzow, 2022-07-07 This open access book offers a framework for understanding how the Holocaust has shaped and continues to shape medical ethics health policy and questions related to human rights around the world The field of bioethics continues to face questions of social and medical controversy that have their roots in the lessons of the Holocaust such as debates over beginning of life and medical genetics end of life matters such as medical aid in dying the development of ethical codes and regulations to guide human subject research and human rights abuses in vulnerable populations As the only example of medically sanctioned genocide in history and one that used medicine and science to fundamentally undermine human dignity and the moral foundation of society the Holocaust provides an invaluable framework for exploring current issues in bioethics and society today This book therefore is of great value to all current and future ethicists medical practitioners and policymakers as well as laypeople Nazi History and the Holocaust, 1999 **The "Black Jew", Germans, Nazis and Nature's Other Creatures** Herbert Louis Heinig, 2004 Most people are unaware of the German Nazis relationship to Black people and how it constantly penetrated their consciousness The reasons for this are cited German Nazi attitudes and racial principles were applied to Blacks as they were to other interior groups By comparing the treatment of Blacks with Jews the author developed a German Nazi concept of the Black Jew as well as his own The solicitous and legal concepts of the treatment of animals also is developed with homosapiens coming out second best A stress is placed upon the
