Quantifying Quality In Policing:

Quantifying Quality in Policing Larry T. Hoover, 1996 The CQ Press Guide to Urban Politics and Policy in the United States Christine Kelleher Palus, Richardson Dilworth, 2016-02-11 The CQ Press Guide to Urban Politics and Policy in the United States will bring the CQ Press reference guide approach to topics in urban politics and policy in the United States. If the old adage that all politics is local is even partially true then cities are important centers for political activity and for the delivery of public goods and services. U.S. cities are diverse in terms of their political and economic development, demographic makeup, governance structures, and public policies. Yet there are some durable patterns across American cities too. Despite differences in governance and or geographic size, most cities face similar challenges in the management of public finances, the administration of public safety and education. And all U.S. cities have a similar legal status within the federal system. This reference guide will help students understand how American cities from old to new have developed over time. Part I: how the various city governance structures allocate power across city officials and agencies. Part II: how civic and social forces interact with the organs of city government and organize to win control over these organs and or their policy outputs. Part III: and what patterns of public goods and services cities produce for their residents. Part IV: The thematic and narrative structure allows students to dip into a topic in urban politics for deeper historical and comparative context than would be possible in either an A to Z encyclopedia entry or in an urban studies course text. **FEATURES** Approximately 40 chapters organized in major thematic parts in one volume available in both print and electronic formats. Front matter includes an Introduction by the Editors along with biographical backgrounds about the Editors and the Contributing Authors. Back matter includes a compilation of relevant topical data or tabular presentation of major historical developments, population growth, size of city budgets, etc. or historical figures, e.g. mayors, a bibliographic essay, and a detailed index. Sidebars are provided throughout and chapters conclude with References, Further Readings, and Cross References to related chapters as links in the e version. This Guide is a valuable reference on the topics in urban politics and policy in the United States. The thematic and narrative structure allows researchers to dip into a topic in urban politics for a deeper historical and comparative context than would be possible in either an A to Z encyclopedia entry or in an urban studies course text. **Police Leadership and**

Using the Police Craft to Improve Patrol Officer Decision-Making James J. Willis, Heather Toronjo, 2023-12-21 In this Element we build on our previous work conceptualizing a craft learning model for governing police discretion We envision a model for harnessing patrol officers craft knowledge and skills learned through experience handling similar street level encounters over time to the development of standards for evaluating the quality of their decision making To clarify the logic of this model and its potential for police reform we situate it within the context of other systems of discretion control including law bureaucracy science and the community We also consider obstacles We conclude that police organizations need to balance the different strategies for channeling and controlling discretion toward the goal of advancing more transparent and principled decision making The challenge is finding a balance that helps prevent arbitrary pernicious or uncompromising uses of police authority but that also empowers and rewards officers for using the skills of perception and resourcefulness that contribute to wise judgment

Edward R. Maguire, 2012-02-01 Although most large police organizations perform the same tasks there is tremendous variation in how individual organizations are structured To account for this variation author Edward R Maguire develops a new theory that attributes the formal structures of large municipal police agencies to the contexts in which they are embedded This theory finds that the relevant features of an organization's context are its size age technology and environment Using a database representing nearly four hundred of the nation's largest municipal police agencies Maguire develops empirical measures of police organizations and their contexts and then uses these measures in a series of structural equation models designed to test the theory Ultimately police organizations are shown to be like other types of organizations in many ways but are also shown to be unique in a number of respects
