Museums Public Understand Of:

Museums and the Public Understanding of Science John Durant, Committee on the Public Understanding of Science, 1992
The essays in this volume are organised thematically The first essay sets the scene by reviewing the present position and future potential of science museums as educational and cultural resources The next section is devoted to the role of museum exhibitions and analyses how exhibitions deal with complex material The third section is concerned with museum programmes and reports on the strengths and weaknesses of different museum programmes ranging from gallery drama to the Boston Museum's innovative experiment with Science by mail

Creating Connections David Chittenden, Graham Farmelo, Bruce V. Lewenstein, 2004-05-17 Science museums are in the business of making science accessible to the public a public constantly bombarded with new information and research results How the public understands this information will affect what they expect and take away from a museum's exhibits and programs Creating Connections looks at the public understanding of research PUR and how it affects what science museums do What are the opportunities and critical issues in PUR What strategies are working and what are some pitfalls What can be learned from the media's experiences with PUR Creating Connections will be an invaluable resource for science museum professionals who want to guide their institutions and their visitors toward a new understanding of and appreciation for current research

Museums and the public understanding of science John Durant, 1992

Public Understanding of Science David Knight, 2006-10-16 Answering questions such as whether the interesting parts of science be conveyed in sermons poems pictures and journalism Knight explores the history of science to show how the successes and failures of our ancestors can help us understand the position science comes to occupy now

Hot Topics, Public Culture, Museums Fiona Cameron, Lynda Kelly, 2020-05-22 Hot Topics Public Culture Museums engages the highly problematic and increasingly important issue of museums science centres their roles in contemporary societies their engagement with hot topics and their part in wider conversations in a networked public culture Hot topics such as homosexuality sexual and racial violence massacres drugs terrorism GMO foods H1N1 swine flu and climate change are now all part of museological culture The authors in this collection situate cultural institutions in an increasingly interconnected complex globalising and uncertain world and engage the why and how institutions might form part of activate conversations and action through discussions that theorise institutions in new ways to the very practical means in which institutions might engage their constituencies

Museums and Archaeology Robin Skeates, 2022-06-19 *Museums and Archaeology* brings together a wide but carefully chosen selection of literature from around the world that connects museums and archaeology Part of the successful Leicester Readers in Museum Studies series it provides a combination of issue and practice based perspectives As such it is a volume not only for students and researchers from a range of disciplines interested in museum gallery and heritage studies including public archaeology and cultural resource management CRM but also the wide range of professionals and volunteers in the museum and heritage sector who work with

archaeological collections The volume's balance of theory and practice and its thematic and geographical breadth is explored and explained in an extended introduction which situates the readings in the context of the extensive literature on museum archaeology highlighting the many tensions that exist between idealistic principles and real life practice and the debates that surround these In addition to this section introductions and the seminal pieces themselves provide a comprehensive and contextualised resource on the interplay of museums and archaeology

Exploring Science in Museums Susan M.

Pearce,1996-01-01 The relationship between science and the public is one of the great contemporary debates Understanding between scientists and non scientists is a key figure in the dialogue and here the interpretation of science in museums has a vital part to play

Public Representations of Immigrants in Museums Yannik Porsché,2018-02-13 This book offers an interactionist perspective on theories of public representation knowledge and immigration in museum institutions Examining how a Franco German museum exhibition represents immigrants and exposes public stereotypes the analysis follows the process of the production and reception of the exhibition as it travelled from Paris to Berlin The author proposes a microsociological contextualisation analysis integrating discourse analysis and ethnography to compare formats of museum work social interaction in the exhibition and mass media debates Visitor reception of the different exhibition versions reveals the symbolic nature of interactions in museums for example concerning conflicting political voices and accusations of censorship Depending on the institutional context interactions in the museums are geared towards securing immigrants a place in national collective memory towards carrying out debate on integration or providing opportunities for personal encounters and reflection beyond national categorisation This book will appeal to students and researchers interested in work on the intersection of sociology cultural studies and discursive psychology in methods of discourse analysis and ethnography and to practitioners working in museums

Museums and the Public

Sphere Jennifer Barrett,2012-04-30 Museums and the Public Sphere investigates the role of museums around the world as sites of democratic public space Explores the role of museums around the world as sites of public discourse and democracy Examines the changing idea of the museum in relation to other public sites and spaces including community cultural centers public halls and the internet Offers a sophisticated portrait of the public and how it is realized invoked and understood in the museum context Offers relevant case studies and discussions of how museums can engage with their publics in more complex productive ways

Controversy in Science Museums Erminia Pedretti,Ana Maria Navas Iannini,2020-04-30 Controversy in Science Museums focuses on exhibitions that approach sensitive or controversial topics With a keen sense of past and current practices Pedretti and Navas Iannini examine and re imagine how museums and science centres can create exhibitions that embrace criticality and visitor agency Drawing on international case studies and voices from visitors and museum professionals as well as theoretical insights about scientific literacy and science communication the authors explore

the textured notion of controversy and the challenges and opportunities practitioners may encounter as they plan for and develop controversial science exhibitions They assert that science museums can no longer serve as mere repositories for objects or sites for transmitting facts but that they should also become spaces for conversations that are inclusive critical and socially responsible Controversy in Science Museums provides an invaluable resource for museum professionals who are interested in creating and hosting controversial exhibitions and for scholars and students working in the fields of museum studies science communication and social studies of science Anyone wishing to engage in an examination and critique of the changing roles of science museums will find this book relevant timely and thought provoking

Behind the Scenes at the Science Museum Sharon Macdonald, 2020-05-21 What goes on behind closed doors at museums How are decisions about exhibitions made and who or what really makes them Why are certain objects and styles of display chosen whilst others are rejected and what factors influence how museum exhibitions are produced and experienced This book answers these searching questions by giving a privileged look behind the scenes at the Science Museum in London By tracking the history of a particular exhibition Macdonald takes the reader into the world of the museum curator and shows in vivid detail how exhibitions are created and how public culture is produced She reveals why exhibitions do not always reflect their makers original intentions and why visitors take home particular interpretations Beyond this local context however the book also provides broad and far reaching insights into how national and global political shifts influence the creation of public knowledge through exhibitions

Museum Provision and Professionalism Gaynor Kavanagh, 2005-06-20 Museums are public places where objects images and memories are kept and shared They exist in infinite variety and contradiction They can be places of great excitement and great boredom sharply insightful and hopelessly bland Museums are anything that the political climate and the imagination allows them to be No two museums are the same The papers which make up this volume give ample evidence of the variety of views that exist about museums They also demonstrate that museums and museum professionals are moving forward with energy and conviction This volume will be invaluable to students and museum professionals and will provoke them to consider museum provision and professionalism in all their forms

Organic Public Engagement Adam S. Lerner, Pat J. Gehrke, 2017-10-03 This book advances organic public engagement methods based on ecological thinking The authors draw on rich multi disciplinary literature in ecological thinking as well as research from public engagement with science events held over the past several years across the United States Through this combination of ecology theory and case studies this book provides both the conceptual foundations and the proven practical applications of public engagement grounded in ecological thinking It offers engagement scholars an effective and efficient means of carrying out their missions while simultaneously building a more ecologically valid method for studying actually existing publics

Science In Public Jane Gregory, Steven Miller, 2000-09-07 Does the general public need to understand

science And if so is it scientists responsibility to communicate Critics have argued that despite the huge strides made in technology we live in a scientifically illiterate society one that thinks about the world and makes important decisions without taking scientific knowledge into account But is the solution to this illiteracy to deluge the layman with scientific information Or does science news need to be focused around specific issues and organized into stories that are meaningful and relevant to people s lives In this unprecedented comprehensive look at a new field Jane Gregory and Steve Miller point the way to a more effective public understanding of science in the years ahead

Anwar,2023-03-24 *A New Direction for Public Understanding of Science* Christopher Rickels,2025-06-30 Engaging the public with science is not an easy task When presented with scientific findings public health recommendations and other scientific information people filter them through their personal values beliefs and biases Science communicators must contend with these issues in order to be effective in cultivating a public understanding of science Given the importance of scientific understanding for living well in a complex world increasing science understanding through science engagement is imperative The field of public engagement with science is dichotomized by a public information deficit approach and a contextualist approach This book proposes a new approach the participant centered model of science engagement incorporating the factual content of science and its epistemic authority but in a way that is sensitive to context It argues for a deliberative democratic approach to public engagement with science and articulates a model inspired by learner centered approaches to teaching in the formal education literature The field of public understanding of science is interdisciplinary with contributing disciplines from communication psychology cognitive science philosophy and the sciences themselves The book will make an excellent reader in graduate level public engagement with science or science technology and society courses

Museums and Public Value Carol A. Scott,2016-04-22 Public Value speaks to our time to the role that museums can play in creating civil societies to the challenges involved in using limited assets strategically to the demand for results that make a difference and to the imperative that we build the kind of engagement that sustains our futures This book assists museum leaders to implement a Public Value approach in their management planning programming and relationship building The benefits are long term public engagement and support which can be used to demonstrate that valuable returns result from public investment in museums A range of authors from around the world unpack the concept of Public Value and examine its implications for museums They situate Public Value within current management theory and practice offer tools for implementation highlight examples of successful practice and examine the evidence of Public Value that governments seek to inform policy and funding decisions The book will be required reading for senior professionals in museums as well as museum and heritage studies students

The Oxford Handbook of the Science of Science Communication Kathleen Hall Jamieson,Dan Kahan,Dietram A. Scheufele,2017-05-17 The proposal to vaccinate adolescent girls against the human

papilloma virus ignited political controversy as did the advent of fracking and a host of other emerging technologies These disputes attest to the persistent gap between expert and public perceptions Complicating the communication of sound science and the debates that surround the societal applications of that science is a changing media environment in which misinformation can elicit belief without corrective context and likeminded individuals are prone to seek ideologically comforting information within their own self constructed media enclaves Drawing on the expertise of leading science communication scholars from six countries The Oxford Handbook of the Science of Science Communication not only charts the media landscape from news and entertainment to blogs and films but also examines the powers and perils of human biases from the disposition to seek confirming evidence to the inclination to overweight endpoints in a trend line In the process it draws together the best available social science on ways to communicate science while also minimizing the pernicious effects of human bias The Handbook adds case studies exploring instances in which communication undercut or facilitated the access to scientific evidence The range of topics addressed is wide from genetically engineered organisms and nanotechnology to vaccination controversies and climate change Also unique to this book is a focus on the complexities of involving the public in decision making about the uses of science the regulations that should govern its application and the ethical boundaries within which science should operate The Handbook is an invaluable resource for researchers in the communication fields particularly in science and health communication as well as to scholars involved in research on scientific topics susceptible to distortion in partisan debate
