Natural Rubber Developments In Crop Science Hardcover:

Natural Rubber M.R. Sethuraj, Ninan T Mathew, 2012-12-02 No other book on natural rubber covers such a broad spectrum of subjects as this unique publication. Subjects related to the biology, cultivation and technology of natural rubber are dealt with along with such important aspects as its history, production and processing through to its sophisticated engineering applications. Every chapter follows a monograph style of presentation with comprehensive citations and depth of treatment. Contributions from highly experienced and still active renowned scientists reflect the truly international effort to the development of this commodity. In addition to the wealth of information presented, most of the chapters contain elaborate lists of earlier contributions in the respective fields. One chapter each has been included on rubber, wood, ancillary products and guayule.

Natural Resources Conservation and Advances for Sustainability Manoj Kumar Jhariya, Ram Swaroop Meena, Arnab Banerjee, Surya Nandan Meena, 2021-09-24 Natural Resources Conservation and Advances for Sustainability addresses the latest challenges associated with the management and conservation of natural resources. It presents interdisciplinary approaches to promote advances in solving these challenges. By examining what has already been done and analyzing it in the context of what still needs to be done, particularly in the context of latest technologies and sustainability, the book helps to identify ideal methods for natural resource management and conservation. Each chapter begins with a graphical abstract and presents complicated or detailed content in the form of figures or tables. In addition, the book compares the latest techniques with conventional techniques and troubleshoots conventional methods with modifications, making it a practical resource for researchers in environmental science and natural resource management. Discusses the pros and cons of past and current endeavors related to natural resource management. Presents recent technologies and methods for management and conservation, particularly with applications for sustainability. Covers a variety of disciplines from environmental science to life science. Includes a graphical abstract as well as a section on significant achievements in the field and future perspectives.
