Natural Selection in Human Populations Carl Jay Bajema,1977 Evolutionary Models and Studies in Human Diversity Robert J. Meier,Charlotte M. Otten,Fathi Abdel-Hameed,2011-06-01 No detailed description available for Evolutionary Models and Studies in Human Diversity **Social and Psychological Aspects of Applied Human Genetics** James R. Sorenson,1972 About 1400 references to books and journal articles primarily concerned with social and psychological issues of applied human genetics in general and genetic counseling in particular Excludes literature dealing with ethical or proscriptive areas Also covers foreign language titles Citations mostly from 1960 s through 1972 Classified arrangement No index Essentials of Genetics Pragya Khanna,2013-12-30 Covers the classical and molecular fields of genetics to enable students to form an integrated overview of genetic principles This book provides up to date basic information on the subject that emphasizes the multifaceted complex questions of life The chapters are descriptive explicit and provided with relevant material that provides a logical transition of classical genetics into modern genetics Emigrating Beyond Earth Cameron M Smith,Evan T. Davies,2012-06-09 Emigrating Beyond Earth puts space colonization into the context of human evolution Rather than focusing on the technologies and strategies needed to colonize space the authors examine the human and societal reasons for space colonization They make space colonization seems like a natural step by demonstrating that if will continue the human species 4 million year old legacy of adaptation to difficult new environments The authors present many examples from the history of human expansion into new environments including two amazing tales of human colonization the prehistoric settlement of the upper Arctic around 5 000 years ago and the colonization of the Pacific islands around 3 000 years ago which show that space exploration is no more about rockets and robots that Arctic exploration was about boating

description available for Toward a Cultural Theory of Education and Schooling **Human Adaptability** Emilio F. Moran, 2018-05-04 Designed to help students understand the multiple levels at which human populations respond to their surroundings this essential text offers the most complete discussion of environmental physiological behavioral and cultural adaptive strategies available Among the unique features that make Human Adaptability outstanding as both a textbook for students and a reference book for professionals are a complete discussion of the development of ecological anthropology and relevant research methods the use of an ecosystem approach with emphasis on arctic high altitude arid land grassland tropical rain forest and urban environments an extensive and updated bibliography on ecological anthropology and a comprehensive glossary of technical terms Entirely new to the third edition are chapters on urban sustainability and methods of spatial analysis with enhanced emphasis throughout on the role of gender in human adaptability research and on global environmental change as it affects particular ecosystems In addition new sections in each chapter guide students to websites that provide access to relevant material complement the text s coverage of biomes and suggest ways to become active in environmental issues *The Knowledge Drive* Edward J. Bardon, 2008-07 The Knowledge Drive is an optimistic book that demonstrates how new more accurate information conveys survival value and inevitably supplants our dysfunctional mythological beliefs Before there was time for the accumulation of knowledge early man created legends and religious myths to understand the world and ease the paralyzing awareness of his own mortality and the fear of natural forces beyond his control We are increasingly aware of how these magical beliefs can lead to divisive religious practices violence and mans continuing inhumanity to fellow man Change is clearly needed Now rapid advances in many fields are giving us the techniques to modify our evolution and curtail our virulence We can establish a more universal equitable morality based on more accurate intelligence about our origins and place in the universe Nevertheless it is up to us as a species to choose our own future directions We are thus in charge of our own destiny a threatening thought to many No prayers or appeals to magical forces will help Dr Bardon analyzes how our quest for knowledge is a basic human drive similar to the sex and nourishment drives It arises from our survival instinct and is not based on moral or altruistic factors Along with establishing knowledge as a source of power the author discusses the Knowledge Drive from many other perspectives its various motivations the fact that it can be used for many purposes even destructive ones how it learns from adversity how it often exacerbates inequality and how it does not solve social problems unless given the necessary direction Dr Bardon looks at the multiple forces aligned against our efforts to obtain more reliable information He shows how the Knowledge Drive not only triumphs over but also learns from these negative elements Warnings about the fragility of our search for knowledge are misguided it is rather the people mired in mythology who are vulnerable and need our compassion
