Library of John Lewis Childs John Lewis Childs,1917 Duke's Handbook of Medicinal Plants of the Bible James A. Duke,2007-12-26 Readers have come to depend on Jim Duke s comprehensive handbooks for their ease of use and artful presentation of scientific information Following the successful format of his other CRC handbooks Duke s Handbook of Medicinal Plants of the Bible contains 150 herbs listed alphabetically and by scientific name Each entry provides illustrations of the plant synonyms notes common names activities indications dosages downsides and interactions natural history and extracts It includes Biblical quotes as well as comments on points of interest **The Lost Language of Plants** Stephen

Harrod Buhner,2002-03-01 Nautilus Book Awards Ecology Environment ForeWord Reviews Book of the Year Silver Medal Environment In the pharmaceutical Silent Spring well known author teacher lecturer and herbalist Stephen Harrod Buhner has produced a book that is certain to generate controversy Inside The Lost Language of Plants you ll find A critique of technological medicine and especially the dangers to the environment posed by pharmaceuticals and other synthetic substances that people use in connection with health care and personal body care A new look at Gaia Theory including an explanation that plants are the original chemistries of Gaia and those phytochemistries are the fundamental communications network for the Earth s ecosystems Extensive documentation of how plants communicate their healing qualities to humans and other animals Western culture has obliterated most people s capacity to perceive these messages but this book also contains valuable information on how we can restore our faculties of perception The book will affect readers on rational and emotional planes It is grounded in both a New Age spiritual sensibility and hard science While some of the author s claims may strike traditional thinkers as outlandish Buhner presents his arguments with such authority and documentation that the scientific underpinnings however unconventional are completely credible The overall impact is a powerful eye opening expos

of the threat that our allopathic Western medical system in combination with our unquestioning faith in science and technology poses to the primary life support systems of the planet At a time when we are preoccupied with the terrorist attacks and the possibility of biological warfare perhaps it is time to listen to the planet This book is essential reading for anyone concerned about the state of the environment the state of health care and our cultural sanity

Plant-derived Natural Products Anne E. Osbourn, Virginia Lanzotti, 2009-07-07 Plants produce a huge array of natural products secondary metabolites These compounds have important ecological functions providing protection against attack by herbivores and microbes and serving as attractants for pollinators and seed dispersing agents They may also contribute to competition and invasiveness by suppressing the growth of neighboring plant species a phenomenon known as allelopathy Humans exploit natural products as sources of drugs flavoring agents fragrances and for a wide range of other applications Rapid progress has been made in recent years in understanding natural product synthesis regulation and function and the evolution of metabolic diversity It is timely to bring this information together with contemporary advances in chemistry plant biology ecology agronomy and human health to provide a comprehensive guide to plant derived natural products Plant derived natural products synthesis function and application provides an informative and accessible overview of the different facets of the field ranging from an introduction to the different classes of natural products through developments in natural product chemistry and biology to ecological interactions and the significance of plant derived natural products for humans In the final section of the book a series of chapters on new trends covers metabolic engineering genome wide approaches the metabolic consequences of genetic modification developments in traditional medicines and nutraceuticals natural products as leads for drug discovery and novel non food crops
