Natural History Of Weasels And Stoats:

The Natural History of Weasels and Stoats Carolyn M. King, 2007 Publisher description **The Natural History of Weasels & Stoats** Carolyn M. King, 1989 A comprehensive treatment of the fierce little predators physical description life cycle and span evolution hunting and reproduction behavior population dynamics the impact on their prey diseases and their relation to humans mostly as pests i e competitors The color plates are informative but the line drawing are marvelous Annotation c Book News Inc Portland OR booknews com *Women and Weasels* Maurizio Bettini, 2024-05-31 If you told a woman her sex had a shared long lived history with weasels she might deck you But those familiar with mythology know better that the connection between women and weasels is an ancient and favorable one based in the Greek myth of a midwife who tricked the gods to ease Heracles s birth and was turned into a weasel by Hera as punishment Following this story as it is retold over centuries in literature and art *Women and Weasels* takes us on a journey through mythology and ancient belief revising our understanding of myth heroism and the status of women and animals in Western culture Maurizio Bettini recounts and analyzes a variety of key literary and visual moments that highlight the weasel s many attributes We learn of its legendary sexual and childbearing habits and symbolic association with witchcraft and midwifery its role as a domestic pet favored by women and its ability to slip in and out of tight spaces The weasel Bettini reveals is present at many unexpected moments in human history assisting women in labor and thwarting enemies who might plot their ruin With a parade of symbolic associations between weasels and women witches prostitutes midwives sisters in law brides mothers and heroes Bettini brings to life one of the most venerable and enduring myths of Western culture **Harmsworth Natural History**, 1910 *Art, Ethics and the Human-Animal Relationship* Linda Johnson, 2021-09-20 This book examines the works of major artists between the seventeenth and nineteenth centuries as important barometers of individual and collective values toward non human life Once viewed as merely representational these works can also be read as tangential or morally instrumental by way of formal analysis and critical theories Chapter Two demonstrates the discrimination toward large and small felines in Genesis and The Book of Revelation Chapter Three explores the cruel capture of free roaming animals and how artists depicted their furs feathers and shells in costume as symbols of virtue and vice Chapter Four identifies speciest beliefs between donkeys and horses Chapter Five explores the altered Dutch kitchen spaces and disguised food animals in various culinary constructs in still life painting Chapter Six explores the animal substances embedded in pigments Chapter Seven examines animals in absentia in the crafting of brushes The book concludes with the fish paintings of William Merritt Chase whose glazing techniques demonstrate an artistic approach that honors fishes as sentient beings **Invasive Predators in New Zealand** Carolyn M. King, 2019-12-12 The story of invasive species in New Zealand is unlike any other in the world By the mid thirteenth century the main islands of the country were the last large landmasses on Earth to remain uninhabited by humans or any other land mammals New Zealand s endemic fauna evolved in isolation until first Polynesians and then

Europeans arrived with a host of companion animals such as rats and cats in tow Well equipped with teeth and claws these small furry mammals along with the later arrival of stoats and ferrets have devastated the fragile populations of unique birds lizards and insects Carolyn M King brings together the necessary historical analysis and recent ecological research to understand this long slow tragedy As a comprehensive historical perspective on the fate of an iconic endemic fauna this book offers much needed insight into one of New Zealand s longest running national crises Stoat in the Dock Carolyn M.

King,2025-05-07 This book surveys the ecology of stoats resident in New Zealand since the 1880s when they were deliberately imported from UK as potential agents of biological control against rabbits Our current understanding of them and of their impacts on the communities of native animals and birds with which they now live has developed over decades of research Past knowledge is essential to inform future decisions on when where and how to minimize damage from stoats in the future New Zealand is one of the most significant known examples of the drastic impacts of invasive predators on endemic species and communities but its story is largely unfamiliar to international audiences This is a detailed academically rigorous and fully documented account of how introduced mustelids have made themselves at home in New Zealand written by a specialist stoat biologist as a single coherent story Each chapter includes a section explaining the context in which the most important details of the biology of stoats and to a lesser extent ferrets have been documented what techniques worked and what did not and why The book is written primarily for the well informed general public plus a cross disciplinary audience of academics senior undergraduates and postgraduates interested in the history of interactions between predators and native wildlife and professionals working on invasive species in New Zealand and elsewhere It will be of special interest to conservationists birdwatchers and naturalists The Handbook of New Zealand Mammals Carolyn King,David

Forsyth,2021-01-20 The Handbook of New Zealand Mammals is the only definitive reference on all the land breeding mammals recorded in the New Zealand region including the New Zealand sector of Antarctica It lists 65 species including native and exotic wild and feral living and extinct residents vagrants and failed introductions It describes their history biology and ecology and brings together comprehensive and detailed information gathered from widely scattered or previously unpublished sources The description of each species is arranged under standardised headings for easy reference Because the only native land breeding mammals in New Zealand are bats and seals the great majority of the modern mammal fauna comprises introduced species whose arrival has had profound effects both for themselves and for the native fauna and flora The book details changes in numbers and distribution for the native species and for the arrivals it summarises changes in habitat diet numbers and size in comparison with their ancestral stocks and some of the problems they present to resource managers For this third edition the text and references have been completely updated and reorganised into Family chapters The colour section includes 14 pages of artwork showing all the species described and their main variations plus two pages of maps *The Natural History and Antiquities of Selborne* Gilbert White,1891 **Silent Fields** Roger

Lovegrove,2008-09-18 Since time immemorial mankind has taken it upon himself to wage war against nature against those species of birds and mammals which he believes conflict with his livelihood This remarkable book documents the history of that battle in England and Wales from the Middle Ages shedding a new light on the history of our much loved wildlife
