The Laws Protecting Animals and Ecosystems Paul A. Rees, 2017-09-20 There is currently no basic text in wildlife law suitable for the wide range of courses in wildlife conservation and animal welfare at both bachelors and masters level or for the large number of people who work in conservation and animal welfare

The Laws Protecting Animals and Ecosystems fills the gap in this significant market for a basic law text applicable to students and professionals whose primary training is in biology but who require a basic understanding of the laws relating to the protection of animals and ecosystems

The text is applicable to a wide range of subjects including wildlife conservation animal handling animal welfare animal husbandry and veterinary science

This foundational text supports those studying animal and ecosystem law by providing an overview of the basic legal principles national and international laws terminology the legal mechanisms used to protect animals and ecosystems and a compendium of the major animal welfare and conservation laws in major English speaking countries

Dr Rees has been teaching wildlife law for 20 years and ecology for over 35 years and is ideally placed to write this book

Natura 2000 - A Coherent Nature Conservation Network? Bettina Kleining, 2024-05-26

This book offers a fresh perspective on the Habitats Directive s rules on designating Natura 2000 the European biodiversity conservation network

Although the Habitats Directive came into force in

the early 1990s the network is not yet optimally set up and lacks coherence and connectivity The author examines the Habitats Directive s provisions regarding the designation of Natura 2000 and discusses possible reasons for the EU Member States ongoing lack of compliance with their designation duties She reassesses the 2015 REFIT Fitness Check of the Nature Directives to look for the Member States reasons for not having optimally complied with their designation duties yet She then analyses the Habitats Directive to reveal elements of non optimal drafting in its designation provisions Sensible law reforms that do not interfere with the general framework of the Habitats Directive and which keep in mind the relevant national regional and international biodiversity law and policy as well as the relevant case law will be discussed to this end As a result this book presents an enhanced legal designation framework that can support Member States compliance with their designation obligations The book finally goes beyond the European biodiversity legislation also shedding light on the effects of the suggested reforms for the broader biodiversity and environmental law and policy landscape and concludes that reforming the Habitats Directive would benefit a variety of contemporary areas of law This book targets academics and policy makers in the field as it provides a scholarly as well as a hands on approach to the subject of strengthening European biodiversity law

species and a willingness to consider what will be necessary to do so In defense of nature and of a vibrant human future contributors confront hard issues regarding contraception abortion immigration and limits to growth that many environmentalists have become too timid or politically correct to address in recent years Ending population growth will not happen easily Creating genuinely sustainable societies requires major change to economic systems and ethical values coupled with clear thinking and hard work Life on the Brink is an invitation to join the discussion about the great work of building a better future Contributors Albert Bartlett Joseph Bish Lester Brown Tom Butler Philip Cafaro Martha Campbell William R Catton Jr Eileen Crist Anne Ehrlich Paul Ehrlich Robert Engelman Dave Foreman Amy Gulick Ronnie Hawkins Leon Kolankiewicz Richard Lamm Jeffrey McKee Stephanie Mills Roderick Nash Tim Palmer Charmayne Palomba William Ryerson Winthrop Staples III Captain Paul Watson Don Weeden George Wuerthner **The Roots of Educational Change** Ann Lieberman, 2007-12-29 ANDY HARGREAVES Department of Teacher Education Curriculum and Instruction Lynch School of Education Boston College MA U S A ANN LIEBERMAN Carnegie Foundation for the Advancement of Teaching Stanford CA U S A MICHAEL FULLAN Ontario Institute for Studies in Education University of Toronto Canada DAVID HOPKINS Department for Education and Skills London U K This set of four volumes on Educational Change brings together evidence and insights on educational change issues from leading writers and researchers in the field from across the world Many of these writers whose chapters have been specially written for these books have been investigating helping initiate and implementing educational change for most or all of their lengthy careers Others are working on the cutting edge of theory and practice in educational change taking the field in new or even more challenging directions And some are more skeptical about the literature of educational change and the assumptions on which it rests They help us to approach projects of understanding or initiating educational change more deeply reflectively and realistically Educational change and reform have rarely had so much prominence within public policy in so many different places Educational change is ubiquitous It figures large in Presidential and Prime Ministerial speeches It is at or near the top of many National policy agendas Everywhere educational change is not only a policy priority but also major public news Yet action to bring about educational change usually exceeds people s understanding of how to do so effectively *New York University Environmental Law Journal* ,2003

Tracking Pythons Kate Messner, 2020-03-03 Burmese pythons are invading Florida These enormous snakes are native to Southeast Asia so when one showed up dead along the side of a Florida highway in 1979 scientists wondered where it came from No one knew the snakes had launched a full scale invasion Pet pythons that escaped or were released by their owners started breeding in the wild and these enormous predators began eating every animal in their path Today a group of scientists at the Conservancy of Southwest Florida is tracking Burmese pythons to find ways to stop their spread Page Plus QR code links lead to video clips and photos of the scientists working in the field Delve into the science of pythons and their role as invasive predators A fascinating example of field biology Who knew that snake science could be so adventurous
