Visual Representations and Interpretations Ray Paton,Irene Neilsen,2012-12-06 The value of multi disciplinary research and the exchange of ideas and methods across traditional discipline boundaries are well recognised Indeed it could be justifiably argued that many of the advances in science and engineering take place because the ideas methods and the tools of thought from one discipline become re applied in others Sadly it is also the case that many subject areas develop specialised vocabularies and concepts and can consequently approach more general problems in fairly narrow subject specific ways Consequently barriers develop between disciplines that prevent the free flow of ideas and the collaborations that on Visual Representations could often bring success VRI 98 a workshop focused Interpretations was intended to break down such barriers The workshop was held in the Foresight Conference Centre which occupies part of the former Liverpool Royal Infirmary a Grade 2 listed building which has been recently restored The building combines a majestic architecture with the latest in new conference facilities and technologies and thus provided a very suitable setting for a workshop aimed at bringing the Arts and the Sciences together of the workshop was to promote inter disciplinary awareness across The main aim a range of disciplines where visual representations and interpretations are exploited Contributions to the workshop were therefore invited from researchers who are actively investigating visual representations and interpretations artists architects biologists chemists clinicians cognitive scientists computer scientists educationalists engineers graphic designers linguists mathematicians philosophers physicists psychologists and social scientists
