Natures End The Consequences Of The Twentieth Century:

Nature's End Whitley Strieber,1986 **Nature's End** Whitley Strieber,James W. Kunetka,1987 European Literature and Theology in the Twentieth Century David Jasper,Colin Crowder,2009-06-17 The central themes of this collection of essays are the mystery of time past present and future and the problems of redemption They are concerned with modern literature the threat of meaninglessness in the postmodern condition and the possibility of salvation In an age of deferral and difference this book addresses itself to eschatology and apocalypse and redemption in through but particularly of time itself Hell and madness are never far away yet the reconfiguration of time and the breaking in of the transcendent continue to suggest theological possibilities beyond the wastelands of the twentieth century To those possibilities we look in hope The Age of Capitalism, Consumer Culture, and the Collapse of Nature in the Anthropocene Jack Thornburg,2024-10-02 The Age of Capitalism Consumer Culture and the Collapse of Nature in the Anthropocene argues that the stability of post industrial postmodern society is threatened by the convergence of three distinct yet interrelated crises environmental degradation capitalist economic development and the primacy of consumption and self absorption as the basis for economic development at the expense of community and social relationships Jack Thornburg contrasts advanced modern society with indigenous cultures in terms of nature and conceptions of the communal self The complex nature of capitalist oriented society has influenced how individuals conceptualize themselves The outcome the author contends is a competitive society in which individuals are alienated living in uncertain times One consequence of these crises all of which derive from the Enlightenment and the concomitant appearance and evolution of capitalism has been the destruction of a worldview balancing and connecting well being with prosperity of the natural world Money and materialism cannot buy happiness as capitalist narrative asserts Thornburg claims that the happiness sought by individuals seeking meaning through consumption can only be realized by reintegrating nature with the human spirit **The New Werner Twentieth Century Edition of the Encyclopaedia Britannica** ,1906 **Reading Programs for Young Adults** Martha Seif Simpson,2015-11-16 School and public libraries often provide programs and activities for children in preschool through the sixth grade but there is little available to young adults For them libraries become a place for work the place to research an assignment or find a book for a report but the thought of the library as a place for enjoyment is lost So how do librarians recapture the interest of teenagers This just might be the answer Here you will find theme based units such as Cartoon Cavalcade Log On at the Library Go in Style Cruising the Mall Space Shots Teens on TV and 44 others that are designed for young adults Each includes a display idea suggestions for local sponsorship of prizes a program game to encourage participation 10 theme related activities curriculum tie in activities sample questions for use in trivia games or scavenger hunts ideas for activity sheets a bibliography of related works and a list of theme related films The units are highly flexible allowing any public or school library to adapt them to their particular needs The Challenges for Russia's Politicized Economic System Susanne

Oxenstierna,2015-04-10 During the early 2000s the market liberalization reforms to the Russian economy begun in the 1990s were consolidated But since the mid 2000s economic policy has moved into a new phase characterized by more state intervention with less efficiency and more structural problems Corruption weak competitiveness heavy dependency on energy exports an unbalanced labour market and unequal regional development are trends that have arisen and which this book argues will worsen unless the government changes direction The book provides an in depth analysis of the current Russian economic system highlighting especially structural and institutional defects and areas where political considerations are causing distortions and puts forward proposals on how the present situation could be remedied On Power:

Al-Rodhan,2022-02-08 On Power Neurophilosophical Foundations and Policy Implications seeks to provide a historical contemporary and predictive analysis of power It aims to explain the history of political power in a unique way by approaching the concept of power through the lens of neurophilosophy the application of neuroscientific principles to practical questions of governance ethics political and moral philosophy In this book Professor Nayef Al Rodhan provides an accessible incisive and provocative take on the history nature and future of power His insights go beyond conventional wisdom by exploring some of the themes that will become increasingly relevant to analysing power in the decades to come A central idea of the book is the highly addictive universal nature of power at the neurochemical level the craving for it and the intense resistance to giving it up in all walks of life and circumstances This can be applied directly to thinking about governance political change public policy national and international peace security and prosperity Al Rodhan formulates an innovative conceptual picture of power by integrating the findings of neuroscience with the broader implications of power in the era of digital connectivity and cognitive and physical enhancement technologies In doing so he guides our approach to political power and public policy influenced by ubiquitous disruptive and intrusive technologies This book will appeal to students and scholars of neuroscience philosophy government business and international relations It will also hold particular interest for politicians public servants think tankers policy makers and journalists as well as senior executives from the corporate sports media and entertainment world
