Natures Invisible Rays:

Nature's Invisible Rays Jacob Kastner,1970 Describes the invisible radiation that occurs naturally on earth One in a series describing the fields of nuclear energy **Nature's Invisible Rays** Jacob Kastner,1970 *Nature's Clocks* Doug Macdougall,2008-06-30 Radioactivity is like a clock that never needs adjusting writes Doug Macdougall It would be hard to design a more reliable timekeeper In *Nature's Clocks* Macdougall tells how scientists who were seeking to understand the past arrived at the ingenious techniques they now use to determine the age of objects and organisms By examining radiocarbon C 14 dating the best known of these methods and several other techniques that geologists use to decode the distant past Macdougall unwraps the last century's advances explaining how they reveal the age of our fossil ancestors such as Lucy the timing of the dinosaurs extinction and the precise ages of tiny mineral grains that date from the beginning of the earth's history In lively and accessible prose he describes how the science of geochronology has developed and flourished Relating these advances through the stories of the scientists themselves James Hutton William Smith Arthur Holmes Ernest Rutherford Willard Libby and Clair Patterson Macdougall shows how they used ingenuity and inspiration to construct one of modern science's most significant accomplishments a timescale for the earth's evolution and human prehistory Nature,1881 Seeing the Invisible James Coates,1909 **Nature** Sir Norman Lockyer,1881 *Blue: The Science and Secrets of Nature's Rarest Color* Kai Kupferschmidt,2022-08-16 This fascinating book delves into art chemistry biology physics geology history and literature in order to elucidate the beautiful mysterious color blue Seattle Book Review Blue is our favorite color globally the darling of artists since the time of the pharaohs So it's startling to turn to the realms of nature and discover that true blue is truly rare The sea and sky are blue but we can't bottle this trick of physics And the few creatures plants and minerals that appear blue are almost all deceiving us There's no blue pigment in a blue jay it would be brown but for how its feathers distort light Kai Kupferschmidt has been enraptured by blue since childhood In *Blue* he invites readers on his globe trotting quest to understand his favorite color from Kyoto where scientists are trying to engineer a blue rose to Brandenburg where conservationists hope to save the little blue macaw Deep underground where blue crystals grow and miles overhead where astronauts gaze at our blue marble planet wherever he finds this alluring color it has a story to tell **Losing Touch with Nature** Mary Thomas Crane,2014-11-24 Aristotelian naturalism and its discontents *Losing touch with nature* Spenser and the new science Shakespeare New forms of nothing Matter and power Epilogue What about Bacon **Routledge Companion to Sixteenth Century Philosophy** Henrik Lagerlund,Benjamin Hill,2017-01-06 Sixteenth century philosophy was a unique synthesis of several philosophical frameworks a blend of old and new including but not limited to Scholasticism Humanism Neo Thomism Aristotelianism and Stoicism Unlike most overviews of this period *The Routledge Companion to Sixteenth Century Philosophy* does not simplify this colorful era by applying some traditional dichotomies such as the misleading line once drawn between scholasticism and humanism Instead the *Companion* closely covers an astonishingly

diverse set of topics philosophical methodologies of the time the importance of the discovery of the new world the rise of classical scholarship trends in logic and logical theory Nominalism Averroism the Jesuits the Reformation Neo stoicism the soul's immortality skepticism the philosophies of language and science and politics cosmology the nature of the understanding causality ethics freedom of the will natural law the emergence of the individual in society the nature of wisdom and the love of god Throughout the Companion seeks not to compartmentalize these philosophical matters but instead to show that close attention paid to their continuity may help reveal both the diversity and the profound coherence of the philosophies that emerged in the sixteenth century The Companion's 27 chapters are published here for the first time and written by an international team of scholars and accessible for both students and researchers **The Essentials of**

Universalism Nicholas Hagger, 2024-10-29 In A Baroque Vision Nicholas Hagger chose key passages from his verse that convey the thread of his Baroque vision In its companion volume The Essentials of Universalism he chooses key passages from his prose works that convey the thread of his Universalism which grew out of his Baroque perspective Hagger's literary mystical religious philosophical historical cultural and political Universalist writings are innovatory In 60 books he has set out a new approach to literature and identified its fundamental theme as a quest for the One an infinite Reality perceived as Light that alternates with condemnation of social follies and vices presented many mystics illuminations seen the Light as the common essence of all religions created a new philosophy of Universalism that restates the unity of the universe and challenges modern philosophy charted the history of the rise and fall of civilisations reconciled the divisions within world culture and proposed a democratic World State with limited supranational power to abolish war and bring in a Golden Age of peace and prosperity The Essentials of Universalism is a stunning anthology of his writings that covers all aspects of his thinking and range Chosen by the author himself the excerpts include the most important passages in the Hagger canon and are representative of his vast output Since the book was completed Hagger has brought out The Algorithm of Creation the first ever statement of a Theory of Everything and a further development of his Universalism This anthology makes clear the main thrust of his life's work and is required reading for all interested in seeing how his many innovations connect
