Natures in Translation Alan Bewell, 2017-01-02 Understanding the dynamics of British colonialism and the enormous ecological transformations that took place through the mobilization and globalized management of natures For many critics Romanticism is synonymous with nature writing for representations of the natural world appear during this period with a freshness concreteness depth and intensity that have rarely been equaled Why did nature matter so much to writers of the late eighteenth and early nineteenth centuries And how did it play such an important role in their understanding of themselves and the world In *Natures in Translation* Alan Bewell argues that there is no Nature in the singular only natures that have undergone transformation through time and across space He examines how writers as disparate as Erasmus and Charles Darwin Joseph Banks Gilbert White William Bartram William Wordsworth John Clare and Mary Shelley understood a world in which natures were traveling and resettling the globe like never before Bewell presents British natural history as a translational activity aimed at globalizing local natures by making them mobile exchangeable comparable and representable Bewell explores how colonial writers in the period leading up to the formulation of evolutionary theory responded to a world in which new natures were coming into being while others disappeared For some of these writers colonial natural history held the promise of ushering in a cosmopolitan nature in which every species through trade and exchange might become a true citizen of the world Others struggled with the question of how to live after the natures they depended upon were gone Ultimately *Natures in Translation* demonstrates that far from being separate from the dominant concerns of British imperial culture nature was integrally bound up with the business of empire *Nature's Bounty* Anthony N. Penna, 2016-07-01 This thorough clearly organized text focuses on four major environmental categories forests and land wildlife and wildlife habitat water and drinking water quality and air Each category is treated historically from the time of exploration and discovery in the seventeenth century to the present There are also discussions on environmental public policy issues currently in our national debate The text is integrated throughout with fascinating primary source documents eyewitness accounts government reports and documents speeches and congressional testimony which illuminate the material Torreya, 1908
