Navy Board Ship Models 1650 1750:

Navy Board Ship Models 1650-1750 John Franklin, 1989 **Navy Board Ship Models** Nick Ball, Simon Stephens, 2018-07-30 A beautifully illustrated history of the early ship models of the Royal Navy that are prized today as works of art From about the middle of the seventeenth century the Royal Navy's administrators began to commission models of their ships that were accurately detailed and for the first time systematically to scale These developed a recognized style which included features like the unplanked lower hull with a simplified pattern of framing that emphasized the shape of the underwater body Exquisitely crafted these were always rare and highly prized objects indeed Samuel Pepys expressed a profound desire to own one and today they are widely regarded as the acme of the ship modeler's art Today examples are the highlights of collections across the world valued both as art objects and as potential historical evidence on matters of ship design However it was only recently that researchers began to investigate the circumstances of their construction their function and the identities of those who made them This book by two curators who have worked on the world's largest collection of these models at the National Maritime Museum in Greenwich England summarizes the current state of knowledge outlines important discoveries and applies this newfound understanding to many of the finest models in the collection As befits its subject *Navy Board Ship Models* is visually striking with numerous color photographs that make it as attractive as it is informative to anyone with an interest in modelmaking or historic ships *Historic Ship Models* Arnold Kriegstein, Henry Kriegstein, 2022-10-04 In terms of quality historical significance and sheer numbers the Kriegstein family's ship model collection in the United States is the finest in private hands anywhere in the world Principally made up of official 17th and 18th century models in the Admiralty or Navy Board style the collection is unrivalled by any museum outside the British national collection at Greenwich As the models are not on public display this book fills the need for a detailed catalogue and visual reference with superb colour photos of all the models both overall portraits and multiple close ups Apart from lengthy descriptions of these magnificent artefacts space is devoted to how they were identified and the valuable research done by Arnold and Henry Kriegstein the identical twins whose shared passion brought this all together Beyond the technicalities of the ships the story has a human dimension in the brothers' adventures in pursuit of every model and their dogged determination to secure them against official obstruction and dubious antiques trade practices This is an entirely new and revised edition of *Seventeenth and Eighteenth Century Ship Models* first published in 2007 now expanded to include the additions to the collection since that date *Building a Miniature Navy Board Model* Philip Reed, 2013-08-01 The expert model maker takes readers through every stage of building a miniature navy board model in this fully illustrated step by step guide In this clear and detailed volume Phil Reed tackles the ultimate expression of the ship model maker's art The Navy Board model These early eighteenth century works of art are well represented in major maritime museums and private collections Here Reed takes on the construction of a miniature 1:192 scale model of the Royal George of 1715 covering all

the conventions of Navy Board framing and planking With nearly 400 photographs each accompanied by explanatory text Building a Miniature Navy Board Model takes readers through every step of the process Methods of hull and deck framing internal and external planking and the construction of the complex stern are all covered The rendering of the multitude of decorative carvings on the figurehead stern and broadside is also demonstrated At the end of the book there is a short section showing his model of The Syren which demonstrates how the techniques used to frame Royal George could be adapted for ships of a later date using single and double frames closer to full size practice **Ship Models from the Age**

of Sail Kerry Jang,2022-04-30 The vast majority of period ship models are built from kits usually primarily of wood with some ready made fittings Although these commercial offerings have improved significantly in recent years all of them can be enhanced in accuracy or detail by an experienced modelmaker This book by an expert ship modeller distils lessons gleaned from a lifetime practising the hobby to the highest standards setting out methods of improving basic kits and gradually developing the skills and confidence to tackle the construction of a model from scratch Using a variety of kits as the starting point each chapter demonstrates a technique that can be readily improved or a feature that can be replaced to the advantage of the finished model Topics include hull planking representing copper sheathing many aspects of more accurate masting and rigging and how to replace kit parts and fittings from scratch Ultimately the impact of a period model depends on its accuracy and the book also provides guidance on plans and references where to find them and how they are best used The plank on frame model sometimes with exposed frames in the Navy Board style has always been considered the crowning achievement of period ship modeling and this book concludes with coverage of the very latest kits that put fully framed models within the reach of ordinary mortals Offering advice expertise and inspiration Ship Models from the Age of Sail has something for anyone interested in building a period ship model whatever their level of skill Pepys's Navy J.
