PROSIM 3 for Windows Chao-Hsien Chu, Michael P. Hottenstein, Paul S. Greenlaw, 1996 Presenting an introduction to the PROSIM computer environment this text includes chapters on each major operation management concept along with data and questions for assignment

Prosim III for Windows Chao-Hsien Chu, Michael P. Hottenstein, Paul Stephen Greenlaw, Paul S. Greenlaw, 1995-12 *Software Process Dynamics* Raymond J. Madachy, 2008-01-07 This book is designed for professionals and students in software engineering or information technology who are interested in understanding the dynamics of software development in order to assess and optimize their own process strategies It explains how simulation of interrelated technical and social factors can provide a means for organizations to vastly improve their processes It is structured for readers to approach the subject from different perspectives and includes descriptive summaries of the best research and applications

Software Process Dynamics and Agility Qing Wang, Dietmar Pfahl, David M. Raffo, 2007-07-04 This book constitutes the refereed proceedings of the First International Conference on Software Process held in Minneapolis MN USA in May 2007 The 28 revised full papers presented together with the abstracts of two keynote addresses cover process content process tools and metrics process management process representation analysis and modeling experience report and simulation modeling

Product-Focused Software Process Improvement Andreas Jedlitschka, Outi Salo, 2008-06-17 On behalf of the PROFES Organizing Committee we are proud to present to you the proceedings of the 9th International Conference on Product Focused Software Process Improvement PROFES 2008 held in Frascati Monteporzio Catone Rome Italy Since 1999 PROFES has established itself as one of the recognized international process improvement conferences The main theme of PROFES is professional software process improvement SPI motivated by product and service quality needs Focussing on a product to be developed PROFES 2008 addressed both quality engineering and management topics including processes methods techniques tools organizations and enabling SPI Both solutions found in practice and the relevant research results from academia were presented Domains such as the automotive and mobile applications industry are growing rapidly resulting in a strong need for professional development and improvement Nowadays the majority of embedded software is developed in collaboration and distribution of embedded software development continues to increase Thus PROFES 2008 addressed different development modes roles in the value chain stakeholders viewpoints collaborative development as well as economic and quality aspects Embedded development was included again as one of the themes Since the beginning of the series of PROFES conferences the purpose has been to bring to light the most recent findings and novel results in the area of process improvement and to stimulate discussion among researchers experienced professionals and technology providers from around the world

Operations Management for Competitive Advantage Richard B. Chase, Nicholas J. Aquilano, F. Robert Jacobs, 2001 Chase Jacobs and Aquilano *Operations Management for Competitive Advantage* 11 e CJA provides a current and thorough introduction to the concepts processes and methods of

managing and controlling operations in manufacturing or service settings The text provides comprehensive coverage from high tech manufacturing to high touch services with a balanced treatment Chase Jacobs and Aquilano also thoroughly integrates and discusses current issues such as globalization supply chain strategy E business and ERP The concepts are illustrated by using abundant real world examples articles illustrations problems and cases Technology is integral to the success of this course as such CJA also provide students and instructors with an innovative array of leading edge technology learning and teaching tools

Product-Focused Software Process Improvement Jürgen Münch, 2007-06-21 This book constitutes the refereed proceedings of the 8th International Conference on Product Focused Software Process Improvement PROFES 2007 held in Riga Latvia in July 2007 The 29 revised full papers presented together with 4 reports on workshops and tutorials and 4 keynote addresses were carefully reviewed and selected from 55 submissions The papers constitute a balanced mix of academic and industrial aspects they are organized in topical sections on global software development software process improvement software process modeling and evolution industrial experiences agile software development software measurement simulation and decision support processes and methods

Software Technologies Pascal Lorenz, Jorge Cardoso, Leszek A. Maciaszek, Marten van Sinderen, 2016-02-24 This book constitutes the thoroughly refereed proceedings of the 10th International Joint Conference on Software Technologies ICSOFT 2015 held in Colmar France in July 2015 The 23 revised full papers presented were carefully reviewed and selected from 117 submissions The papers are organized around the following conference tracks enterprise software technologies software project management software engineering methods and techniques distributed and mobile software systems

Advances in Production Management Systems Norio Okino, Hiroyuki Tamura, Susumu Fujii, 2013-06-29 This volume includes 41 revised papers selected from 125 papers presented at the 6th IFIP Technical Committee 5 Working Group 5.7 International Conference on Advances in Production Management Systems APMS 96 held at Kyoto Japan 4-6 November 1996 The task of selecting papers was accomplished by the IPC members voting The selected papers were reviewed by IPC members who attended the conference Based on the comments of reviewers each paper was revised and rewritten in the format of this book Therefore the quality of each paper was raised very much The papers selected in this volume were classified into invited articles and six themes taking into account the perspectives and future challenges in production management systems Invited articles provide the overview of the present and future trend in the manufacturing world Six themes were Next Generation Manufacturing Systems and Production Management Benchmarking Integration in Manufacturing and Decentralized Production Management Strategic Aspects Production Planning and Production Scheduling Each theme covers important area of present and future production management reflecting the recent trend in manufacturing toward globalization agility in variety production human centered manufacturing environment consciousness and so on We hope that this volume will emerge a lot of new ideas to reach the goal of IFIP WG5.7 Computer Aided Production Management and to bridge the gap between

research and industrial practice in production management systems Guide to Advanced Empirical Software Engineering

Forrest Shull, Janice Singer, Dag I. K. Sjøberg, 2007-11-21 Empirical studies have become an important part of software engineering research and practice Ten years ago it was rare to see a conference or journal article about a software development tool or process that had empirical data to back up the claims Today in contrast it is becoming more and more common that software engineering conferences and journals are not only publishing but eliciting articles that describe a study or evaluation Moreover a very successful conference International Symposium on Empirical Software Engineering and Measurement journal Empirical Software Engineering and organization International Software Engineering Research Network have all evolved in the last 10 years that focus solely on this area As a further illustration of the growth of empirical software engineering a search in the articles of 10 software engineering journals showed that the proportion of articles that used the term empirical software engineering doubled from about 6% in 1997 to about 12% in 2006 While empirical software engineering has seen such substantial growth there is not yet a reference book that describes advanced techniques for running studies and their application This book aims to fill that gap The chapters are written by some of the top international empirical software engineering researchers and focus on the practical knowledge necessary for conducting reporting and using empirical methods in software engineering The book is intended to serve as a standard reference **Product Release Planning**

Guenther Ruhe, 2010-06-16 Business success hinges on successfully creating products with the right features You must correctly analyze the needs of the customer and match these needs with your resources to not only produce a product and but also deliver it in a timely manner An in depth understanding of systematic release planning can put you on this path Authored by ren **Making Globally Distributed Software Development a Success Story** Qing Wang, Dietmar Pfahl, David Raffo, 2008-05-06 This volume contains papers presented at the International Conference on Software Process ICSP 2008 held in Leipzig Germany during May 10 11 2008 ICSP 2008 was the second conference of the ICSP series The theme of ICSP 2008 was Making Globally Distributed Software Development a Success Story Software developers work in a dynamic context of frequently changing technologies and with limited resources Globally distributed development teams are under ever increasing pressure to deliver their products more quickly and with higher levels of quality At the same time global competition is forcing software development organizations to cut costs by rationalizing processes outsourcing part of or all development activities reusing existing software in new or modified applications and evolving existing systems to meet new needs while still minimizing the risk of projects failing to deliver To address these difficulties new and modified processes are emerging including agile methods and plan based product line development Open Source COTS and community developed software are becoming more and more popular Outsourcing coupled with 24 7 development demands well defined processes to support the coordination of organizationally and geographically separated teams The accepted papers present completed research or advanced work in progress in all areas of software and systems development process including agile software pr

esses CMMI novel techniques for software process representation and analysis process tools and metrics and the simulation and modeling of software processes Contributions reflecting real world experience or derived directly from industrial or open source software development and evolution were particularly welcome Production Management Methods Cláudio Walter, Francisco José Kliemann, José Palazzo Moreira Oliveira, 1994 National borders are becoming increasingly open for goods and ideas and this is creating challenges both for the industrialized countries and for the developing world Most countries wish to keep and to grow their industries and this requires the design and operation of very complex systems in such a way as to maximize jobs profits and the quality of life in general under quite different conditions An improved understanding of the distinct operations variable trade offs indeed quite individual conceptual models of manufacturing systems in different regions is therefore necessitated This publication addresses various aspects involved in the achievement of the aim It presents new developments in production management methods tools for the evaluation of them and assessments of the adequacy of different production management methods applied to various classes of production systems Test cases and application statistics are analysed thereby affording a comprehensive picture of the present situation and a vision for enhanced future development **Contemporary Empirical Methods in Software Engineering** Michael

Felderer, Guilherme Horta Travassos, 2020-08-27 This book presents contemporary empirical methods in software engineering related to the plurality of research methodologies human factors data collection and processing aggregation and synthesis of evidence and impact of software engineering research The individual chapters discuss methods that impact the current evolution of empirical software engineering and form the backbone of future research Following an introductory chapter that outlines the background of and developments in empirical software engineering over the last 50 years and provides an overview of the subsequent contributions the remainder of the book is divided into four parts Study Strategies including e g guidelines for surveys or design science Data Collection Production and Analysis highlighting approaches from e g data science biometric measurement and simulation based studies Knowledge Acquisition and Aggregation highlighting literature research threats to validity and evidence aggregation and Knowledge Transfer discussing open science and knowledge transfer with industry Empirical methods like experimentation have become a powerful means of advancing the field of software engineering by providing scientific evidence on software development operation and maintenance but also by supporting practitioners in their decision making and learning processes Thus the book is equally suitable for academics aiming to expand the field and for industrial researchers and practitioners looking for novel ways to check the validity of their assumptions and experiences Chapter 17 is available open access under a Creative Commons Attribution 4 0

PROFES 2004 held in Kansai Science City Japan Since 1999 PROFES has established itself as one of the recognized international process improvement conferences In 2004 the conference left Europe for the first time and moved to Japan Japan and its neighboring countries are intensifying their efforts to improve software engineering excellence so it was a logical step to select Japan as the venue for PROFES 2004 The purpose of the conference is to bring to light the most recent findings and results in the area and to stimulate discussion between researchers experienced professionals and technology providers The large number of participants coming from industry confirms that the conference provides a variety of up to date topics and tackles industry problems The main theme of PROFES is professional software process improvement SPI motivated by product and service quality needs SPI is facilitated by software process assessment software measurement process modeling and technology transfer It has become a practical tool for quality software engineering and management The conference addresses both the solutions found in practice and the relevant research results from academia This is reflected in the 41 full papers which are a balanced mix of academic papers as well as industrial experience reports

Proceedings of the 33rd International MATADOR Conference David R. Hayhurst, 2012-12-06 by Conference Chairman n1 It is my pleasure to introduce this volume of Proceedings for the 33 MATADOR Conference The Proceedings include 83 refereed papers submitted from 19 countries on 4 continents 00 The spread of papers in this volume reflects four developments since the 32 MATADOR Conference in 1997 i the power of information technology to integrate the management and control of manufacturing systems ii international manufacturing enterprises iii the use of computers to integrate different aspects of manufacturing technology and iv new manufacturing technologies New developments in the manufacturing systems area are globalisation and the use of the Web to achieve virtual enterprises In manufacturing technology the potential of the following processes is being realised rapid proto typing laser processing high speed machining and high speed machine tool design And at the same time in the area of controls and automation the flexibility and integration ability of open architecture computer controllers are creating a wide range of opportunities for novel solutions Up to date research results in these and other areas are presented in this volume The Proceedings reflect the truly international nature of this Conference and the way in which original research results are both collected and disseminated The volume does not however record the rich debate and extensive scientific discussion which took place during the Conference I trust that you will find this volume to be a permanent record of some of the research carried out in the last two years and
