Prosody and Humor Salvatore Attardo, Manuela Maria Wagner, Eduardo Urios-Aparisi, 2013-11-15 This is the first ever book length collection of articles on the subject of prosody and humor The chapters are written by the recognized leaders in the field and present the cutting edge of the research in this new interdisciplinary field of study The book covers a broad range of languages using several theoretical approaches ranging from cognitive semantic theories to discourse analysis and anthropology All the contributions are anchored in instrumental empirical data analysis The topics covered range from humor in conversation to sitcom scripts from riddles to intonation jokes from irony in a laboratory setting to irony occurring in conversation from friends conversations in France to business meetings in rural Brazil The unifying theme is the search for markers of the humorous or ironical intentions of the speakers or of the genre of interaction Originally published in Pragmatics Cognition 19 2 2011 and 19 3 2011 **Intonation in L2 Discourse** María Dolores Ramírez-Verdugo, 2021-07-11 Grounded in a systemic functional linguistic SFL approach this book applies a contrastive interlanguage corpus based approach to investigate the nature and role of L2 intonation and its pragmatic function in spoken discourse The volume offers a brief overview of SFL theories and frameworks with a clear focus on Halliday s model of phonology and the proposal of developing a grammar of speech Integrating a SFL framework with a corpus linguistic informed approach the book uses this foundation as a jumping off point from which to explore the prosodic complexities involved in English language teaching and learning for L2 learners highlighting its various functions as illustrated in examples from the UAM English Learner Spoken Corpus A final chapter synthesizes these findings toward critically reflecting on future directions for the study of L2 speech

speech as the physical manifestation of affectivity and affectivity involved in the learning process with a strong component of inter culture and identity In sum overly narrow perspectives on affective language can only be avoided if we continue to bring together scientific and didactic studies of affectivity as a broad and diverse whole

Phonological Templates in Development Marilyn May Vihman, 2019-10-30 This book explores the role of phonological templates in early language use from the perspective of usage based phonology and exemplar models and within the larger developmental framework of Dynamic Systems Theory After analysing children s first words and their adult targets Vihman sets out procedures for establishing the children s later prosodic structures and templates drawing on data from American and British English Estonian Finnish French Italian and Welsh she also provides briefer longitudinal accounts of template use in Arabic and Brazilian Portuguese The children are found to begin with simple word forms that match their selected adult targets this is followed by the production of more challenging words adapted to fit the child s existing patterns Early accuracy is replaced by later recourse to an inner model a template of a favoured word shape The book also examines the timing fading quantification and function of child phonological templates In addition two chapters focus on the use of templates in adult language in the core grammar and in the more creative morphology of colloquial short forms and hypocoristics in French and Estonian and of English rhyming compounds The idea of templates is traced back to its origins in Prosodic Morphology but its uses are most in evidence in the informal settings of adult language at play Throughout the volume the discussion returns to the issues of emergent systematicity the roles of articulatory and memory challenges for children and the similarities and differences in the function of templates for adults as compared with children
