Selected Papers Of C C Hsiung Chuan-chih Hsiung, 2001-04-30 This invaluable book contains selected papers of Prof Chuan Chih Hsiung renowned mathematician in differential geometry and founder and editor in chief of a unique international journal in this field the Journal of Differential Geometry During the period of 1935-1943 Prof Hsiung was in China working on projective differential geometry under Prof Buchin Su In 1946 he went to the United States where he gradually shifted to global problems Altogether Prof Hsiung has published about 100 research papers from which he has selected 64 in chronological order for this volume

PROSPECTS IN MATHEMATICS- LECTURES GIVEN AT A SYMPOSIUM- ANNALS OF MATHEMATICS STUDIES , The Algebraic Structure of Group Rings Donald S. Passman, 2011-01-01 Highly recommended by the Bulletin of the London Mathematical Society this book offers a comprehensive self contained treatment of group rings The subject involves the intersection of two essentially different disciplines group theory and ring theory The Bulletin of the American Mathematical Society hailed this treatment as a majestic account proclaiming it encyclopedic and lucid 1985 edition

Collected Papers of John Milnor John Willard Milnor, 1994

Group Theory From A Geometrical Viewpoint Alberto Verjovski, Etienne Ghys, Andre Haefliger, 1991-08-12 This proceedings presents the latest research materials done on group theory from geometrical viewpoint in particular Gromov's theory of hyperbolic groups Coxeter groups Tits buildings and actions on real trees All these are very active subjects

Algebra and its Applications H. L. Manocha, J. B. Srivastava, 1984-05-31 This volume unites more than fifty international mathematicians spotlighting research that demonstrates the importance of algebra in science and engineering Areas in algebra such as invariant theory group representations commutative algebra and algebraic geometry are important factors in such subjects as quantum physics computing and data communications The International Symposium on Algebra and Its Applications was organized by the Department of Mathematics of the Indian Institute of Technology and held in New Delhi India December 21-25 1981 This volume contains papers presented and the editors wish to express their appreciation to all the authors for their submissions and symposium participants for their enthusiasm

Infinite Crossed Products Donald S. Passman, 2013-07-24 This groundbreaking monograph in advanced algebra addresses crossed products which involve group and ring theory and the study of infinite

group algebras group graded rings and the Galois theory of noncommutative rings 1989 edition Lecture Notes in Pure and Applied Mathematics, 1987 *The Abel Prize 2008-2012* Helge Holden, Ragni Piene, 2014-01-21 Covering the years 2008 2012 this book profiles the life and work of recent winners of the Abel Prize John G Thompson and Jacques Tits 2008 Mikhail Gromov 2009 John T Tate Jr 2010 John W Milnor 2011 Endre Szemerédi 2012 The profiles feature autobiographical information as well as a description of each mathematician's work In addition each profile contains a complete bibliography a curriculum vitae as well as photos old and new As an added feature interviews with the Laureates are presented on an accompanying web site <http://extras.springer.com> The book also presents a history of the Abel Prize written by the historian Kim Højlund and includes a facsimile of a letter from Niels Henrik Abel which is transcribed translated into English and placed into historical perspective by Christian Skau This book follows on *The Abel Prize 2003-2007 The First Five Years* Springer 2010 which profiles the work of the first Abel Prize winners *Journal of Differential Geometry*, 1983 Buildings Peter Abramenko, Kenneth S. Brown, 2008-12-16 This text started out as a revised version of *Buildings* by the second named author 53 but it has grown into a much more voluminous book The earlier book was intended to give a short friendly elementary introduction to theory accessible to readers with a minimal background Moreover it approached buildings from only one point of view sometimes called the old fashioned approach A building is a simplicial complex with certain properties The current book includes all the material of the earlier one but we have added a lot In particular we have included the modern or W-metric approach to buildings which looks quite different from the old fashioned approach but is equivalent to it This has become increasingly important in the theory and applications of buildings We have also added a thorough treatment of the Moufang property which occupies two chapters And we have added many new exercises and illustrations Some of the exercises have hints or solutions in the back of the book A more extensive set of solutions is available in a separate solutions manual which may be obtained from Springer's Mathematics Editorial Department We have tried to add the new material in such a way that readers who are content with the old fashioned approach can still get an elementary treatment of it by reading selected chapters or sections In particular many readers will want to omit the optional sections marked with a star The introduction below provides more detailed guidance to the reader Recent Advances in Algebraic Geometry Christopher D. Hacon, Mircea Mustață, Mihnea Popa, 2015-01-15 Contemporary research in algebraic geometry is the focus of this collection which presents articles on modern aspects of the subject The list of topics covered is a roll call of some of the most important and active themes in this thriving area of mathematics the reader will find articles on birational geometry vanishing theorems complex geometry and Hodge theory free resolutions and syzygies derived categories invariant theory moduli spaces and related topics all written by leading experts The articles which have an expository flavour present an overall picture of current research in algebraic geometry making this book essential for researchers and graduate students This volume is the outcome of the conference Recent Advances in Algebraic Geometry held in Ann Arbor Michigan to honour
